SENTRAL ANALYSIS

OVERVIEW

1. What problem does this module solve?

ℹ️ Schools employ multiple ways to assess student learning and progress. Analysis module enables schools to assess student learning, growth, and progress via integration with Sentral modules but also though the importing of standardised tests. Analysis diagrammatically tracks student progress against school, state, and national levels so staff can make informed decisions to support student learning.

2. How does Sentral solve this?

ℹ️ **The Sentral Analysis Module:**

The ease of configuring this module ensures that the staff can start assessing student progress and learning.

- Online NAPLAN statistics and school-based data

- Integrates with Sentral Attendance, Academic Reporting and Continuum Tracker modules

- School, year, class, student, and cohort views

- Longitudinal view of student performance

- Identify trends to improve decision making and individual instruction

- Import several recognised standardised assessment tests

3. Who will use and get value from this Module?

ℹ️ The Analysis module will be used by teaching staff who handle student learning, progress and individualised learning plans. A deep understanding of current school policies and procedures is essential to ensure managing student learning and needs is centralized & managed. Analysis also benefits the parent & student community as to the academic progress of students and required assistance for growth.
