SENTRAL CONTINUUM TRACKER

OVERVIEW

1. What problem does this module solve?

Schools employ multiple ways to engage student learning and track the progression of student learning and achievement. Continuum Tracker module enables the tracking of student and cohort assessment to learning outcomes. Mapping student progression along a continuum provides schools with rich data on achievement of outcomes over time.

2. How does Sentral solve this?

The Sentral Continuum Tracker Module:

The ease of configuring this module ensures that the schools can start engaging with progression tracking easily;

- Simple & easy navigation

- Up to date state and national curriculum

- Ability to edit markers and breakpoints that define success in a Continuum

- Able to create school specific continuums

- Easily review, analyse & updating of progress for student and/or cohort.

- Print reports for student and cohorts

- Track achievement over time and view progress. A longitudinal view of student performance

- Identify trends to improve individualized instruction for student (Intervention).

- Publish to the Parent Portal

SENTRAL CONTINUUM TRACKER

3. Who will use and get value from this Module?

i The Continuum Tracker module will be used by teaching staff who handle student learning and progress. A deep understanding of current school policies and procedures is essential to ensure student achievements, progression and early intervention are tracked for each student online. Continuum Tracker also benefits the parent community who work with teachers towards achieving progress for their child.
