SENTRAL PROFILES

OVERVIEW

1. What problem does this module solve?

Schools capture relevant data related to their students in Sentral modules. Profiles draws all this data together into the Profiles modules to provide a holistic view of the student. Profiles module handles data related to the student and allows additional data to be entered for that student. It provides an efficient, effective and clear end to end solution that seamlessly manages key processes and workflows for student management. Profiles enables staff to keep up to date, manage and control; everything related to the student.

2. How does Sentral solve this?

The Sentral Profiles Module:

The ease of configuring this module ensures that the schools can start managing student data immediately. Profiles can be as basic or as detailed as you like to manage general student information as well as a holistic view of cohort and group data for reporting. It provides;

- Simple & easy navigation

- Easy filtering and search functionality to view student or school data with reporting capability.

- Information that's most relevant and accessible in real time.

- Has seamless integration to the other Sentral modules.

- Student management at your fingertips to enables better understanding of the student and communication with parents.

- No more notices or paperwork.

- Track Information: Easy access and reporting – all data is stored automatically and readily available.

3. Who will use and get value from this Module?

The Profiles module will be used by administrative and general staff who handle student management and data. A deep understanding of current school policies and procedures is essential to ensure data collection is centralized & transparent. Profiles also benefits the student & parent community for a better holistic view.
