SENTRAL ROSTERS

OVERVIEW

1. What problem does this module solve?

All schools are required to create rosters to assist with day-to-day assignment of timetables, duties etc. The rosters module handles the creation of online rosters for playground duty, library classes and class teaching (where a timetable program does not exist). The module is simple and fast to configure to your specific school's processes and requirements.

2. How does Sentral solve this?

The Sentral Rosters Module:

The ease of configuring this module ensures that schools can start creating specific rosters for staff

- Simple & easy tab navigation
- Ability to search & view timetables/rosters
- Timetables can be populated via automatic staff lists, or can be edited manually, and saved for public viewing or for your own personal use.
- Individual staff can create their own class timetables

3. Who will use and get value from this Module?

The Rosters module will be used by administrative and teaching staff who handle school Rostering of duties and other timetabling needs. A deep understanding of current school policies and procedures is essential to ensure management & communication is centralised & transparent.
