

|| SENTRAL FOR TEACHERS APP

OVERVIEW

1. What problem does this module solve?

i Educators juggle a host of administrative tasks related to student activities, learning progress, well-being and overall development, and struggle to stay on top of their daily admin tasks while away from the classroom or their desks. There is a need for a mobile solution to access teaching tools on the go, facilitating quick responses and seamless management of key tasks, allowing them the convenience to respond in 'the moment' when a computer is not nearby.

Some examples of 'jobs-to-be-done' that the Sentral for Teachers App addresses:

- When teachers need to manage key tasks, such as marking the roll while away from a computer.
- When teachers want the convenience of checking their schedules between classes or on the go.
- When teachers are on playground duty and need to swiftly record incidents, Sentral for Teachers simplifies wellbeing incident reporting.
- In emergencies, when teachers must account for students during evacuations, Sentral for Teachers aids in efficient roll marking to ensure proper accounting of students.

2. How does Sentral solve this?

i The Sentral for Teachers App is the mobile companion that empowers educators to perform key tasks while on the go, with convenience.

Sentral's approach is to focus on tasks that teachers frequently perform on the Sentral platform, tasks that can be actioned 'in the moment' on a mobile device without compromising useability, simplicity, and efficiency. These tasks are called 'mobile moments' and include activities such as taking attendance and checking schedules.

It is important to note that not all tasks that can be performed on the Sentral platform can be considered as 'mobile moments'. More complex tasks such as writing reports or creating lesson plans require more detail and consideration and are best suited to performing on the platform. Tasks of this nature are not managed by the Sentral for Teachers App.

Available on iPhone and Android, the Sentral for Teachers App allows tasks such as:

- marking the roll
- accessing teaching timetables
- recording wellbeing incidents
- performing evacuation roll calls.

3. Who will use and get value from this Module?

i The Sentral for Teachers App will be used by teachers or educators who require the convenience of a mobile solution to help them perform key teacher tasks that they typically performed on the Sentral platform while 'in the moment' and on the go.
