Using Markbook

Target Audience

- Faculty Heads & Teaching Staff

Content

Within this course staff will learn how to:

- Creating a Markbook (higher level access required).
- Add Classes to Markbooks
- Access Levels
- Planning Markbooks Column Layouts
- Creating a Markbook Task and Calculation.
- Link Markbook results to Curriculum.
- Entering Markbook Data and Running Calculations.
- Markbook Calculation Types in more detail
- Other Actions in Markbook
- Linking a personal Markbook result to a faculty Markbook result.

Overview

Staff will learn how to setup their required faculty and/or Primary Markbooks, including creating specific tasks and calculations linked to standards and then enter results within them as required.

Creating a new Faculty Markbook

Note: To create a shared Markbook, you will need to make sure you have the correct levels of access. If the **Create Faculty Markbook** button is not appearing for you and you need to create a faculty Markbook, you will need to speak to your Faculty Coordinator or Sentral Administrator.

1. Click on the green **Create Faculty Markbook** button  in the top right-hand corner of the screen.

The **New Faculty Markbook** screen will pop up.

New Faculty Markbook ✕

Markbook Name:

Markbook Print Name:
Use this field if you want an alternative name displayed on the PDF printout.

Category:

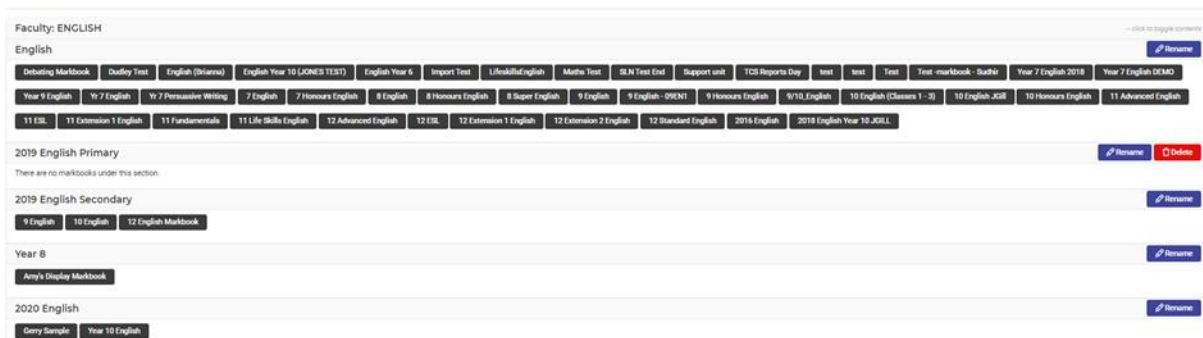

1. Enter text into the text fields, tick the toggle boxes and use the drop-down lists for your input.

You should be able to select any category for a faculty you have access permissions to (if you cannot see the relevant faculty here, speak to your Sentral Administrator).

NOTE: Ensure the new Markbook is assigned to a Faculty or it will appear in the **No Faculty** list.

2. Enter details of the new Markbook.
3. Click on the **Save** button  in the bottom right.

The window will disappear, and the new Markbook (and category if you created one) will appear on your Markbook home screen. **Faculty Markbooks** always appear underneath **All Faculty Markbooks Tab**.

NOTE: Rather than create new faculty Markbooks for all years & subjects, faculty heads are better off working on one Markbook setup and then copying that structure to other years or faculties.

Add Classes to Markbooks

1. To add classes to a **Faculty Markbook**, click on the black button with the Markbooks name on it.

For this example, we will use the Year 8 English that was just created.

The Markbook screen will open.

English — 8 English — Overview		
Reimport All Classes Add Classes Access Levels Rename Copy Structure Edit Delete		
Class	Students	
08EN1 — Wai Paterson, Robert Jones	15 students	Import from CSV Reimport Students Remove
08EN2 — Ginette Hoskins, Robert Jones	13 students	Import from CSV Reimport Students Remove
08EN3 — Sharita Gellatly	15 students	Import from CSV Reimport Students Remove
All Students	43 students	
Left Students	1 left students	

- Click on the green **Add Classes** button  in the top centre of the screen.

The **Add Class** window will pop up and display.

Add Class ×

Add a Roll Class to this markbook EXT (2021) ▾

Add a Class to this markbook

- (0)
- AR Test Class (2019)
- AR Test Class 2 (2019)
- Arlyne Elder (2021)
- Brooker Ferry (2021)
- Castle House (2015)
- Class Albert (2020)
- COMFS (2021)
- EEC (2021)

All Students	43 students	
Left Students	1 left students	

- Step 2 can be repeated at any time to add additional classes if required.

Access Levels

Access levels or permissions allow Faculty Heads to define levels of access for staff. Schools may wish to allow staff to modify tasks and calculations, or not and control access.

Markbook Default Access ×

Default teacher task access:

Modify tasks columns

Edit task values

View tasks

Not see tasks

Default teacher calculation access:

Modify calculations

Refresh calculations

View calculations

Not see calculations

Set the default access levels for teachers.

1. There are task permissions Faculty Heads need to define.
2. Faculty Heads can define/restrict access to calculation in Markbooks.

Planning Markbooks Column Layouts

Before diving into adding tasks and calculations, as a staff it is important to design consistent structures, naming conventions and layout of Markbook so they are meaningful to the teaching staff.

1. Click on one of the classes associated to the Markbook. This will give you a view of not unlike an excel spreadsheet that is blank.

Students are listed to the left-hand side and there are currently no columns.

2. To add columns either click on **Edit** whilst in this view or **Edit** back on the Markbook page.

3. Select **New Column Group** and type in the name. Below example displays on the Edit page once task/calculations are added.

Name		Max mark
Semester 1		
☰	AT1 Essay Task (Mark)	Assessment Task 1 - Responding to Fiction 20
☰	T2Cr Task (Mark)	Task 2 Creative 20
☰	S1 % Add	S1% 100
☰	HY Map Multilinear Mapping	HY Mapped 100
☰	S1 Grade Grade	Semester 1 Grade N/A
☰	ET1 Task (Mark)	Essay T1 100
Semester 2		
☰	AT1 Cr Task (Mark)	AT1 Creative 20
☰	AT2 CR Task (Mark)	AT2 Comparative Poetry Essay 15
☰	AT3 Task (Mark)	AT3 Group Media Project 10
☰	AT3 hist Task (Mark)	AT3 historical narrative 10

- The examples below give you an idea of naming conventions. This is how the layout will look within a Markbook. Schools can label the columns by term, semester, subject, assessments and so on. Something that is meaningful to the teachers of those subjects.

Semester 1					Semester 2												
AT1 Essay /20	T2Cr /20	S1 % /100	HY Map /100	S1 Grade	ET1 /100	AT1 Cr /20	AT2 CR /15	AT3 /10	AT3 hist /10	AT4 Oral /15	ATS Yearly /20	ATS Yearly /20	exam total /40	Exam % /100	YCMark /100	Rank /43	Grade

- Schools can run calculations on tasks across columns. The idea of the column name is more for ordering and grouping of assessment tasks.
- The **Duplicate**  Button, enables teacher to duplicate and rename an entire column, including tasks and calculations. This may be handy if your tasks/calculations are identical for each semester let's say.

Creating Markbook Tasks and Calculations

The following procedure is to show users how to create tasks in the Markbook that teachers can then enter in their results, as well as calculations which can apply to tasks and other calculations (such as simply additional, weighted averages, ranks etc).

- Open the Markbook you wish to add a task and/or calculation to, by clicking on the black button.

The Markbooks home screen will open.

English — 8 English — Overview		Report All Classes	Add Classes	Access Levels	Rename	Copy Structure	Edit	Delete		
Class	Students							Import from CSV	Reimport Students	Remove
OREN1 — Val Peterson, Robert Jones	15 students							Import from CSV	Reimport Students	Remove
OREN2 — Ginette Hoskins, Robert Jones	13 students							Import from CSV	Reimport Students	Remove
OREN3 — Shanta Gallyly	15 students							Import from CSV	Reimport Students	Remove
All Students	43 students									
Left Students	1 left students									

- Click on the **Edit**  in the top right-hand corner or click on the class and the **Edit Markbook** button.

The list of tasks and calculations in the Markbook will display. New Markbooks will have no columns, tasks or calculations displayed.

Markbook layout (8 English)

Name	Max mark	Options
Semester 1		
AT1 Essay Task (Mark)	Assessment Task 1 - Responding to Fiction	20
T2Q Task (Mark)	Task 2 Creative	20
S1 % Add	S1%	100
HY Map Multistep Mapping	HY Mapped	100
S1 Grade Grade	Semester 1 Grade	N/A
E11 Task (Mark)	Essay T1	100

To create a new task

1. Click on the **New Task**  button.

The **New Task** window will display.

Add New Task ✕

Task Name:

Column Heading:

Task Type: MARK GRADE TEXT RUBRIC

Task Date:  ✕ clear

Task Weighting:

Maximum Mark: /

Column group: No Group ▼

How many decimal places would you like to show for marks?

Whole numbers only (don't show decimal places)

Show rounded to 1 decimal place

Show rounded to 2 decimal places

Show rounded to 3 decimal places

Save Cancel

1. Enter text into the text fields, tick the toggle boxes and use the drop-down lists for your input.
2. Things to consider.

Task type: will this be a mark(numeric), grade, text, or rubric). Depending on the one you select, the options below this change.

Grade: if selected, you must choose one of the school-based scales.

Rubric: you can either create a new template or use existing. More on rubrics can be viewed further in this document.

3. Click on the **Save** button at the bottom of the screen.

The window will close, and the task will appear in the Markbook.

To create a new calculation

1. Click on the green **New Calculation** button 

The **Add/Modify Calculation** screen will display.

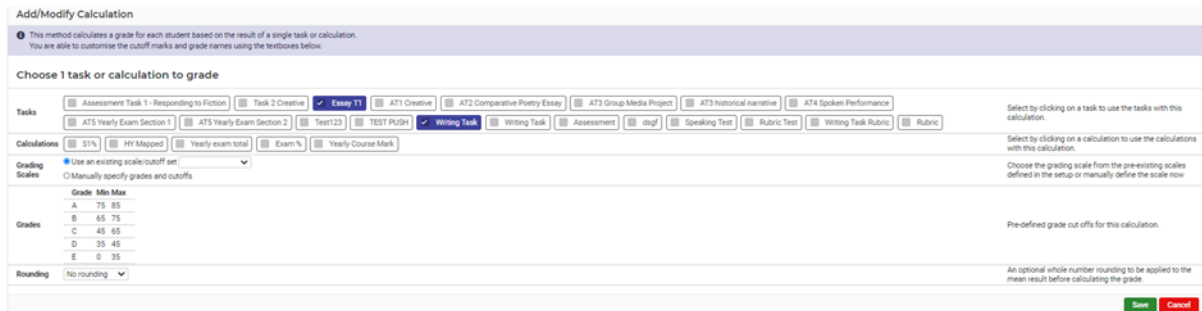

1. Enter text into the text fields, tick the toggle boxes and use the drop-down lists for your input.

Note: calculation types explained further down.

2. Click on the **Next** button  at the bottom of the window.

The screen will change to display options over which tasks and/or calculations this calculation should be based on.

3. In the **Tasks** section click on any tasks you would like to be included. The task will then highlight blue to indicate it has been selected.
4. In the **Calculation** section click on any calculations you would like to be included. The calculation will then highlight blue to indicate it has been selected.
5. Click whether to **Rank 0 Mark as Max Mark**. With this is turned ON, all students with a 0 mark in the column will be allocated the rank of "last". E.G., =110/110. Students with a blank entry will be allocated N/A in the rank.

With this turned OFF, all students with a 0 in the column will be ranked in order with other students in the column. If several students have a zero score, they will be ranked equally, and may not actually have the last rank of the total number of students. E.g., =105/110. Students with a blank entry will be allocated N/A in the rank.

6. Click on the **Save** button  at the bottom of the window.

The window will close, and the calculation will appear in the Markbook.

7. Use the hamburger icon  to move Columns, tasks, and calculations ordering.

Link Markbook results to curriculum

The following procedure is to show users how to link a result in the Markbook to a particular outcome within the curriculum.

1. Click on a black **Markbook** button  to go into that Markbook.

The relevant Markbook screen will display.

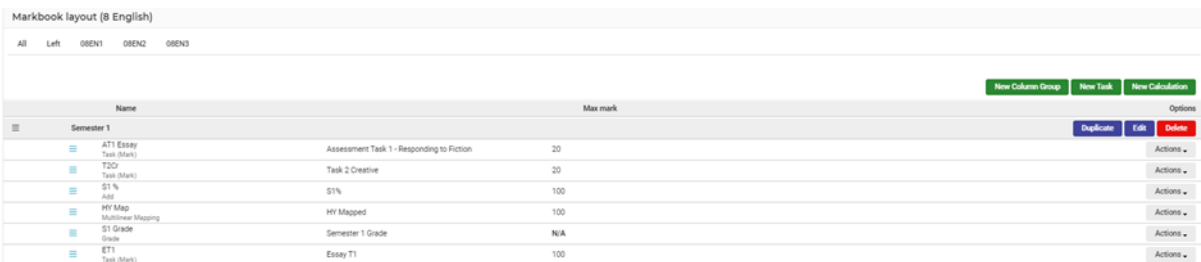

Class	Students	Import from CSV	Reimport Students	Remove
O8EN1 - Wal Paterson, Robert Jones	15 students	Import from CSV	Reimport Students	Remove
O8EN2 - Gemete Hoskins, Robert Jones	13 students	Import from CSV	Reimport Students	Remove
O8EN3 - Sharita Gellaly	15 students	Import from CSV	Reimport Students	Remove
All Students	43 students			
Left Students	1 left students			

2. This screen shows all the classes that are connected to that Markbook, the teacher/s connected to each class and the number of students in each class.

3. Click on the **Edit** button  in the top right corner.

The **Markbook Layout (Markbook Name)** screen will display.

Name	Max mark	Options
Semester 1		Duplicate Edit Delete
AT1 Essay Task (Mark)	Assessment Task 1 - Responding to Fiction 20	Actions
T2D Task (Mark)	Task 2 Creative 20	Actions
S1 % Add	S1% 100	Actions
HF Map Multimap-Maping	HF Mapped 100	Actions
S1 Grade Grade	Semester 1 Grade N/A	Actions
ET1 Task (Mark)	Essay T1 100	Actions

This screen has a list of all the tasks and calculations in the Markbook.

4. For the task/calculation you desire to link to a Standard, click on the **Actions** button  on the right-hand side of the screen.

A drop-down menu will appear.

5. From the list select **Curriculum Link** option.

A pop-up **Link Curriculum Outcomes** window will display.

To enter results for a Grade type Task

1. Click on the name of the task at the top of the column.

When you click, a white menu will appear.

2. Click on the **Edit Grades** option.

The column in the Markbook will change to dropdown menus that you can now click on.

3. Click on the arrow for a particular cell. The dropdown menu will open.

4. Select the correct grade by clicking on it.

5. When you have finished entering the grades, click on the **Save** button at the base of the column.

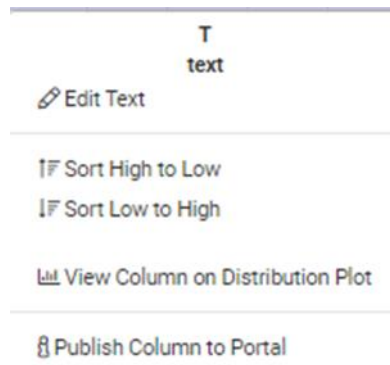

The grades will now appear in the column.

To enter results for a Text type Task

1. Click on the name of the task at the top of the column.

A white menu will appear.

2. Click on **Edit Text**.

The column will change to open fields that you can now click on.

3. Click on each field and type in the desired comment.

4. When finished, click on the **Save** button at the bottom of the column.

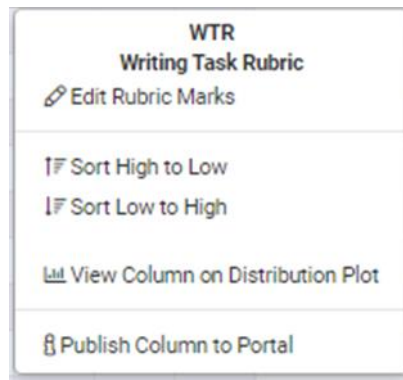

The column will now display the feedback written in.

Fft1 /0
Working well - trying hard.
Not enough practice - needs to work on timing.
Fantastic delivery, high quality content.
Didn't submit today - rescheduled for Tuesday...
Overall strong but poor mechanics.
Confused thesis - needs more work on...

To enter results for a Rubric type Task

1. Click on the name of the task at the top of the column.

A white menu will appear.

2. Click on **Edit Rubric Marks**.

The **Editing Rubric Marks** screen will display.

Writing Rubric_5	minimal Value: 1	adequate Value: 2	strong Value: 3	outstanding Value: 4
Mechanics	Many spelling, grammar, and punctuation errors; sentence fragments; incorrect use of capitalization	Some spelling and grammar errors; most sentences have punctuation and are complete; uses upper- and lowercase	Few spelling and grammar errors; correct punctuation; complete sentences	Correct spelling, grammar, and punctuation; complete sentences; correct use of capitalization
Ideas & Content	Key words are not near the beginning; no clear topic; no beginning, middle, and end; ideas are not ordered	Main idea or topic is in first sentence; somewhat focused topic; attempts beginning, middle and end sections; some order of main idea and details in sequence	Good main idea or topic sentence; main idea is fairly broad; has good beginning, middle, and end sections; main idea and details are sequential, as appropriate	Interesting, well-stated main idea or topic sentence; uses logical plan with an effective beginning, middle, and end; good flow of ideas from topic sentence to details in sequence
Peer Interaction	Uncooperative, off task, unproductive	Works with partner most of the time	Effectively works with partner; participates in discussions most of the time	Consistently and actively works with partner; contributes knowledge, opinions, and skills

If a result needs to be adjusted, click on a different cell to change the result. As student results are updated on the right-hand side rubric, their mark in the left-hand side table will automatically adjust.

5. Repeat steps 7 and 8 until all the data that needs to be entered has been entered.

6. Scroll to the base of the screen and click on the green **Save Rubric Marks**

The marks will now display in the column.

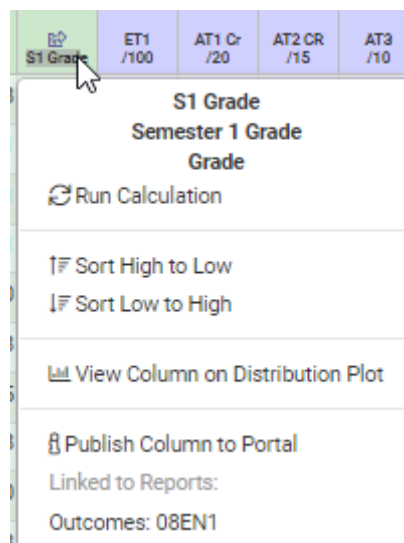

WTR /12

To run a calculation

If ACL's have been set to allow you to run calculations. This might only be the faculty head who can do this for all classes.

1. Click on the calculation name at the top of the column.

A menu will appear.

2. Click on **Run Calculation**.

The results of the calculation will then appear in the column.

RST /19
4
=2
1
5
6
=2

3. The column will display yellow if the task or calculation cannot be run or is incomplete due to missing data.

Other Actions in Markbook

Faculty Heads and teaching staff can perform more actions within a Markbook.

1. Tasks & Calculations – by clicking on a task within Markbook, a menu appears to allow staff to Edit and add tasks marks, grades, text, or rubric.

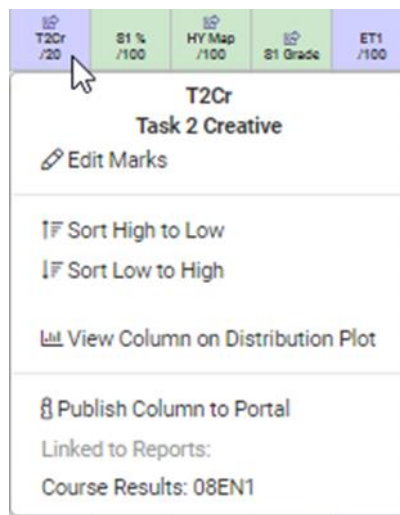

2.

Sorting – by selecting this option you can display the tasks from high to low or low to high.

View Column or Distribution graph – enables teachers to view tasks visually in a graph form

Publish to Portal – if setup for student and parents, teacher can display the task to the portal. If this has been published, an “i” appears in the column. For calculations, additional information displays related tasks.

A blue arrow may also indicate that this task/calculation is linked to a report.

3. Class Results and Overall results display at the bottom of every Markbook and are automated.

Class results	Mean	12.80	2.26	64.00	73.47
	Stddev	3.80	0.68	18.99	13.75
	Median	12.00	2.27	60.00	70.50
	Min	4	1	20	40
	Max	20	4	100	100
Overall results	Mean	12.05	2.26	60.24	70.96
	Stddev	3.19	0.68	15.96	10.52
	Median	12.00	2.27	60.00	70.50
	Min	4	1	20	40
	Max	20	4	100	100

- The Tab across the top enables staff added functionality.

- 123 – is the default page for a Markbook. Click on % or standard deviation symbol to change the view of tasks and calculations.
- Faculty Heads can toggle between individual classes, view left students, or view ALL classes.

View All enables Faculty Heads to view entire course, cohort, and classes of that subject.

43 students in 3 classes

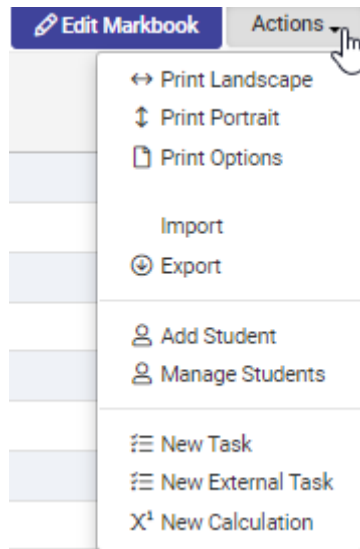

#	Students		Class	Semester 1						
				AT1 Essay /20	T2Cr /20	S1 % /100	HY Map /100	S1 Grade	ET1 /100	g /D
1	Cabbage	Katelynn	08EN1	17	3	85	88	A	45.00	B
2	Creswick	Rodrick	08EN1	12		60	71	C	56.00	
3	Hochaimi	Alex	08EN1	12	2	60	71	C	37.00	B
4	Humphery	Elmer	08EN1	12	2	60	71	C		
5	Jenner	Joelle	08EN1	20	4	100	100	A		C

As a read only page, teachers can sort columns and view the class or overall results statistically.

- Additionally, faculty heads can **Export** or **Print** this page

- On the Class Markbook screen staff can select **Action** button.

You can **Print landscape or Portrait**.

Import or Export – staff can import data from CSV if the columns are identical and criteria matches.

Add a Student - Students may be added to this Markbooks class manually. Students added in this fashion will not be removed when the class list of students is updated, however students may be set to inactive and will appear as a 'left' student.

Manage Students – this function is used to manage students Active/Inactive status, pin students or move students between classes. Students need to be selected first.

Move/Pin students
✕

Active	<div style="display: flex; justify-content: space-between; align-items: center;"> <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No </div> <p style="font-size: 0.8em; margin-top: 5px;">An inactive student cannot have marks placed against them and will not count towards calculations etc.</p>
Pinned	<div style="display: flex; justify-content: space-between; align-items: center;"> <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No </div> <p style="font-size: 0.8em; margin-top: 5px;">Pinned students will not be moved, deleted or reinstated by any automatic measure such as refreshing classes.</p>
Class	<div style="display: flex; justify-content: space-between; align-items: center;"> <input type="text" value="09ENH1"/> </div> <p style="font-size: 0.8em; margin-top: 5px;">Students can be manually moved between classes. Be aware that if they are not also pinned they may be moved back if a class list is refreshed.</p>

New task, new external task, or new calculation – an edit function to add more tasks or calculations to this Markbook.

New External Task – identical to a task in every way except you are selecting a provider – CANVAS, MOODLE, or EDMODO.

Copy Personal Marks to Faculty Markbooks

Columns of marks from your Personal Markbook can be published to columns in Faculty, Stage, or Year Group Markbooks to which you have access.

NOTE: You can only publish from your private Markbook to a faculty Markbook if you are the registered teacher for that class.

1. Go to your Personal Markbooks and select the Markbook.
2. Click on the Task header at the top of a column and select **Publish to Faculty** from the list.

3. Select a Markbook from the drop-down list, click on the **Column / Task** you are publishing to and then click the Save button.

Publish Class Column ✕

Publish the results of "Project Development" from class 08TE13 to:

Target Audience

- Faculty Heads & Teaching Staff

Content

Within this course staff will learn how to:

- Printing
- Exports
- Archives
- Deleted Markbooks
- Rubrics

Overview

Staff will learn how to perform other functions within Markbook module.

Printing

Staff can select to Print off slips for their Markbooks. Print Markbook scores to hand to students, on a small slip, displaying the selected marks recorded for them. Markbook has a Printing panel where you can design the layout of your Sign off Slips.

Markbook > Printing > Print sign off slips

The screenshot shows a 'Sign off slips' options panel. It includes a dropdown menu for 'Markbook:' with the following items: 'Select...', 'All Faculty', 'Ewan Maths 7', '2 Unit Crocodile Wrestling English', 'Untitled Markbook', '2020 - Year 10', 'New Subject', '2020 - Year 9 v2', and 'MB'.

1. Go to **Printing** in the menu and **Sign Off Slips**
2. Select the Markbook and complete options online and **Print**.

The screenshot shows the 'Sign off slips' configuration form with the following fields and options:

- Options:
- Markbook: English
- Columns: Choose a value...
- Class: 7C
- Style: Basic
- Mean: No (selected), Class, Overall
- Highest Result: No (selected), Class, Overall
- Include Signature: No (selected), Yes
- Print button

3. Select the criteria you wish to display.
4. A report will generate based on select criteria.

Archives

Archived Markbooks are still able to be viewed, but will no longer appear in the menu, and cannot be edited. Archiving should not be undone, so make sure Markbooks are finalised before adding them to an archive.

Markbooks should be copied at end of every year in preparation for the new year and labelled as such, then Markbooks can be archived as they do not carry over into the new year.

This page allows staff to review passed Markbooks and hence it is important that Markbooks are labelled by Year (2020)

Manage faculty archives

i Archived markbooks are still able to be viewed, but will no longer appear in the menu, and cannot be edited. Archiving should not be undone, so make sure markbooks are finalised before adding them to an archive.

1. New archives allow teachers to archive current Markbooks and choose an archived name. Click on the Markbooks to change the from grey to blue. **Create Archive.**

NOTE: Click on toggle content to expand or contract.

Deleted Markbooks

Deleted Markbooks can no longer be viewed, but you now have the option to restore previously deleted Markbooks.

Note: to allow users to access and restore Faculty markbooks that have been deleted, permission needs to be given access via **Sentral Cog > Manage User Accounts > Manage Permissions > Markbook**

1. From the left-hand menu in **Markbook**, select **Deleted Markbooks > Faculty Markbooks.**

The Manage Deleted Faculty Markbooks screen displays. By default, the current Year's Markbooks that have been deleted display.

Manage Deleted Faculty Markbooks

i Deleted markbooks can no longer be viewed. Selecting below markbooks will give you the option to reactivate them into a category.

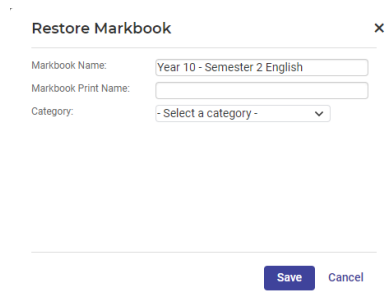

Faculty	Category	Markbook	Actions
ENGLISH	English	Year 10 - Semester 2 English	Restore
ENGLISH	English	ENG (JOSH)	Restore
ENGLISH	English	ENG (JOSH)	Restore
HSIE	HSIE	COMFS (JOSH)	Restore
HSIE	HSIE	EEC (JOSH)	Restore
PDHPE	PDHPE	Community and Family Studies	Restore
PDHPE	PDHPE	COMFS (JOSH)	Restore
DRAMA	Drama	SEN-31309 Replication	Restore

2. To change the Year, click on Current Year drop down.

3. Click on the **Restore** button beside the Markbook you wish to restore.

The Restore Markbook screen displays.

4. Enter the **Markbook Name**, **Print Name** and select **Category** from the drop-down list.

5. Click on the **Save** button.

The Markbook will be restored and display under the faculty.

Rubric Templates

A rubric is a scoring guide to evaluate performance and assess students against certain criteria. For you and your

Schools can create subject based rubric and define the criteria and rating scale for assessment.

TAS Rubric Templates				+ Create New Rubric Template
Name	Year Level	Created By	Actions	
IST Semester 2 Project 2	Year 10	Nik Geo	Actions -	
Semester 1 S1	Year 9	Nik Geo	Actions -	
IST Semester 2.0 Project 2	Year 10	Nik Geo	Actions -	

You can create Rubrics directly on the home screen of Markbooks or whilst you are in a Markbook creating a task. These are often best defined by executives and faculty heads.

1. Create New Rubric Template

New Rubric Template Cancel Save Rubric

Rubric Name: Faculty:
If this Rubric is saved as a template, it will be categorised using the faculty.

Display Areas on:
Areas, or Rows are displayed on the left side of the Rubric table by default when marking student Rubrics. Select "Top" to display the Areas on the top of the table.

School Year:
If this Rubric is saved as a template, setting a school year can help refine a user's search.

Rubric Description:

+ Add Row - Remove Row + Add Column - Remove Column

	Column 1	Value: 1	Column 2	Value: 2	Column 3	Value: 3	Column 4	Value: 4	Column 5	Value: 5
Row 1	Click to edit text...		Click to edit text...		Click to edit text...		Click to edit text...		Click to edit text...	
Row 2	Click to edit text...		Click to edit text...		Click to edit text...		Click to edit text...		Click to edit text...	
Row 3	Click to edit text...		Click to edit text...		Click to edit text...		Click to edit text...		Click to edit text...	
Row 4	Click to edit text...		Click to edit text...		Click to edit text...		Click to edit text...		Click to edit text...	
Row 5	Click to edit text...		Click to edit text...		Click to edit text...		Click to edit text...		Click to edit text...	

Rubric:
Adding/Removing Columns & Rows
 • Clicking "Add Row" or "Add Column" will append one new row or column to the table.
 • Clicking "Remove Row" or "Remove Column" will remove the last row or column from the table.

Editing Column & Row Headings
 • Click on the row or column heading you wish to edit.
 • When you click on a Column heading, two boxes will appear. The larger box is for the column name and the smaller one is for the value applied for that column. The column is also known as the Achievement.
 • When you click on a Row heading, one box will appear. This is the area.
 • Press Enter or click away from the boxes to finish editing.

Editing Criteria
 • Click on the criteria cell you wish to edit.
 • A text field will appear.
 • When a criteria cell is selected, you can navigate around the grid by using: "Tab", "Tab + Shift", "Enter", "Shift + [Arrow Keys]"
 • Holding Shift and pressing Enter will go down one line in the active text field.
 • To finish editing click away from the table.

2. Staff can Name Rubrics, assign to a faculty, apply school years, define areas, and add a detailed description.

Adding/Removing Columns & Rows

3. Clicking **Add Row** or **Add Column** will append one new row or column to the table.
4. Clicking **Remove Row** or **Remove Column** will remove the last row or column from the table.

Editing Column & Row Headings

5. Click on the row or column heading you wish to edit
6. When you click on a Column heading, two boxes will appear. The larger box is for the column name and the smaller one is for the value applied for that column. The column is also known as the Achievement.
7. When you click on a Row heading, one box will appear. This is the area.
8. Press Enter or click away from the boxes to finish editing.

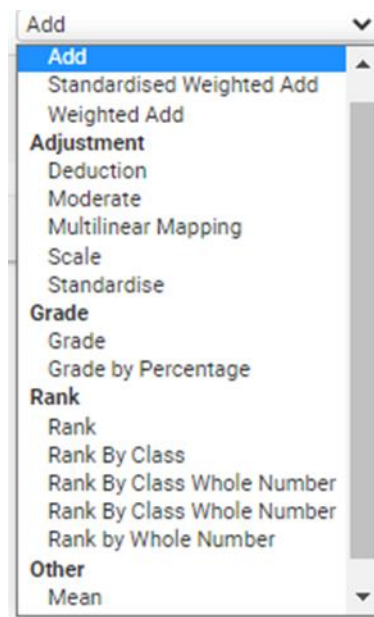

Editing Criteria

9. Click on the criteria cell you wish to edit.
 10. A text field will appear
 11. When a criteria cell is selected, you can navigate around the grid by using: "Tab", "Tab + Shift", "Enter", "Shift + [Arrow Keys]"
 12. Holding Shift and pressing Enter will go down one line in the active text field
- To finish editing click away from the table.

	Advanced	Value: 1	Proficient	Value: 2	Basic	Value: 3	Limited	Value: 4
Ideas	Presents ideas in original manner		Presents ideas in consistent manner		Ideas are to general		Ideas are vague or unclear	
Organisation	Strong organisation and clear beg/mid/end		Organised with beg/mid/end		Some organisation and attempt at beg/mid/end		No organisation/ lack of beginning/middle and end	
Word Choice	Sophisticated use of nouns and verbs makes essay informative and mature		Nouns and verbs make essay informative		Needs more nouns and verbs and better phrasing		Little no use of nouns and verbs and lack of mature word choices	
Mechanics	No punctuation of spelling errors		Few spelling and punctuation errors, minor grammatical errors		A number of spelling and punctuation errors		many spelling, punctuation and grammatical errors that interferes with the meaning	

Markbook Calculation Types in more detail

Markbook can perform a wide variety of Calculations using the data you have entered for each student.

Below is some more specific detail about the functioning of each calculation.

Add calculations

Adds values together across multiple columns.

Empty values will be counted as zero.

The result will be scaled if the total maximum marks of the values being added are different to the result's maximum mark.

Standardised Weighted

Converts values to z scores, weights z scores, and stretches results that someone receiving 100% on every test would receive 100%, and someone receiving 0% on every test would receive 0%.

Accepts two or more values.

Accepts an amount of weightings equal to the number of values (these can be a ratio as well as a percentage).

Any missing values for columns being added will cause this calculation to skip the student and give them an N/A.

The results will be scaled if the total maximum marks of the values being added are different to the result's maximum marks.

Weighted Add

Converts values to a common denominator, weights, and adds them together, then scales to the new maximum mark.

Accepts two or more values.

Provide a weighting for only those values you want to include in the total.

Weightings can be a ratio or a percentage. Any missing values for columns being added will cause this calculation to skip the student and give them N/A.

Adjustment Calculations Moderate

Allows the mean and standard deviation of one column to be applied to another.

Accepts exactly two columns.

This calculation uses the same process as standardise, except that the mean and standard deviation are taken from another column.

Any missing values for columns will cause this calculation to skip the student and give them an N/A.

The results will be scaled if the total maximum marks of the values being added are different to the result's maximum mark.

Deduction

Assessments may need to have a mark deducted to penalise students for late work, incompleteness of work etc.

Select the task or calculation and determine the % to be deducted from the original mark and the maximum % that can be deducted from the original mark

Multilinear Mapping

Modifies the shape of the distribution for a set of marks using mapping points.

Key points in the original marks are mapped to destination marks with marks distributed between and including consecutive mapping pairs being stretched or squashed.

These are linear, so if we have two mapping pairs of 20 -> 40 and 40 -> 50, a student's result of 30 would be mapped to 45, and a result of 25 would be mapped to 42.5.

Accepts exactly one column, and two or more consecutive mapping pairs.

This calculation also adds two assumed mapping points of 0 -> 0 and (original maximum mark) -> (mapped column maximum mark).

Consecutive mapping points are allowed to be equal, 20 -> 30 and 40 -> 30 is allowed (all values between 20 and 40 would be mapped to 30).

Values are not rescaled.

Scale

Rescales a column to a new maximum mark.

Accepts exactly one column.

This calculation is used as a secondary calculation when rescaling is required

Standardise

Changes a column's mean and standard deviation.

Accepts exactly one column, one new mean and one standard deviation. This calculation uses the same process as moderate, except that the user specifies what the new mean and standard deviation will be.

Values are not rescaled.

Grade Calculations

Assigns a grade to values within user-defined bands.

Accepts exactly one column, multiple grade bands.

Grade band values must be contiguous (that is, the maximum of one must be the minimum of another) so that it is not possible to have values that fall between bands. e.g., If A had a minimum of 85 and B had a maximum of 84, a grade would not be able to be assigned to a student who received a mark of 84.5.

In the event of a value falling on the border of two bands, the grade is assigned to the better hand, e.g. A has a minimum of 85 and B has a maximum of 85, a student with a mark of 85 would receive an A.

In the event of a value falling on the border of two bands, the grade is assigned to the better band. E.g., A minimum of 85 and B has a maximum of 85, a student with a mark of 85 would receive an A.

Grades are stored in the database as integers and need to be converted to their grade values for display.

Grade by Percentage

Assigns a defined percentage of grades to a list of marks.

Accepts exactly one column.

The percentage bands for this calculation must add to 100. (Ratios are not allowed).

It is assumed that percentage bands will be input from best to worst.

Values are assigned to the higher grade if there is any room left in the band, even if most of the percentage that the mark would fill is in a lower grade. e.g., if there are 3 marks, and the Bands are A-40% and B-60%, the highest two marks would receive A and the lowest would receive B.

In the event of equal values spilling over bands, all equal marks would receive the higher grade and any following values will assume that the places in the lower grade have been taken. e.g., for the marks 100, 90, 90, 50 and the Bands A-40% and B-20% and C-40%, normally the top two marks would receive A, the 3rd would receive B and the 4th would receive C. However, since the 2nd and 3rd marks are equal, the 3rd mark will also receive an A, but the 4th mark will still receive a C.

Ranking Calculations

Ranks values from highest to lowest.

Accepts exactly one column.

Values that occur more than once will result in an equal rank for multiple students with following ranks being skipped. E.g., Results of 10, 10 and 8 would result in ranks of 1, 1 and 3.

This calculation can produce unexpected results from users since it ranks on raw marks rather than what is displayed (often 2 or less decimal places). As a result, students with the same displayed result can receive different ranks. E.g., Results of 8.914, 8.912 would result in ranks of 1 and 2 even though those results will likely be displayed to users as 8.91 and 8.91 (equal).

Ranks obtained by this calculation must not be used for Board of Studies rankings. Rank by whole number must be used instead.

Rank by Class Same as for Rank (above), but only uses the values of a single class, rather than the entire Markbook.

Rank by Whole Number Ranks values from highest to lowest after rounding values to the nearest whole number.

Accepts exactly one column.

Values that occur more than once will result in an equal rank for multiple students with following ranks being skipped. E.g., Results of 10, 10 and 8 would result in ranks of 1, 1 and 3.

Ranks obtained by this calculation should be used for Board of Studies rankings.

Other Calculations

Mean Finds the mean of a set of values.

Accepts two or more columns.

The results are not scaled.

The mean is obtained by adding all the existing results and dividing by the number of added results.

Task Average Takes the mean of a column and assigns this value to every student.

Accepts exactly one column.

This calculation is for use in reports, where the subject average is required.

The result is not scaled.

Estimates This is not a standard calculation (i.e., cannot be a calculation column). It is used to estimate a student's missing mark in the general Markbook tasks.

Accepts one or more columns.

Estimates are calculated by looking at the student's average z score across columns where they have marks and creating their estimated mark in the same position in the estimating column.

Estimates are run by clicking on an empty task cell or existing estimate and choosing to estimate.

Estimates cannot be run on non-empty, non-estimated cells even if the value is 0.

Saving a column that contains an estimate should retain knowledge that the mark is an estimate.

Manually changing an estimated mark should assume that it is no longer an estimate.

It should not be possible to use the column for which a mark is being estimated as one of the columns that is being used to estimate.

Glossary of Terms

Sentral software contains many drop-down lists and areas to add detail relevant to data entry for Markbooks. The list below provides further information on data entry fields. Each school can configure various elements and add to the list of data entry fields, so this is a default list of glossaries of terms.

Item	Description	Type
Markbook Name	Markbook Name	text
Markbook Print Name	Markbook Print Name	text
Category	select Category for Markbook	list selection
Rubric	A specific criterion for grading or scoring	list selection
Roll Class	Add a roll class to a Markbook	list selection
Class	Add a class or multiple classes to a Markbook	list selection
Task Name	The Name of the Task	text
Column Heading	Text	auto populated
Task Type	Select the Type of Task - Mark, Grade, Text, or Rubric	radio button
Task Date	Select the Task Date	calendar entry
Task Weighting	Select how much percentage the score holds for task	text
Maximum Marker	Select the Maximum Marker out of 100	text
Decimal Places	How many decimal places to show for the marks	list selection
