

Release Notes

Version 25.7.0
Release date 10/11/2025

Core Platform

Issues Resolved

- In Enterprise Setup Audits, we've added the ability to filter based on table and export data to excel

Academic Reports

Improvements

- Added the ability to include faculty headers in Subject List component for ACT Certificate style
- Add board endorsed courses for S6
The following board endorsed courses have been added to curriculum reference:
MSF20522 Certificate II in Furniture Making Pathways
SIT20322 Certificate II in Hospitality
MEM10119 Certificate I in Engineering
SIS30521 Certificate III in Sport Coaching

New Features

- Within the 'Self Assessment' component, there is a new option to display 'Subject' or 'Overall self assessments'
Users also have the option to include a subject name header

Activities

Improvements

- Added the ability to search and filter attendees within an Activity
- When copying an activity all information in the activity is copied, except for the start date, end date and permission due dates
- When copying activities, users can choose if they want to copy over attachments, approval forms and risk assessments
- When the approval workflow is completed or if the activity is archived, any messages created by users using the approval workflow feature can still be viewed
- A new warning message appears when attempting to delete an event created for a Sport type activity

Issues Resolved

- Students were not getting auto approved in the waiting list for some Activities
- The purge function was not deleting staff broadcast messages for all users

Admissions

Issues Resolved

- Newly added students were not displaying in search results

Attendance

Improvements

- **Uploaded Bus Routes provided by the Kwoon Chung Bus Company**
- **Added the Student Code to the Daily Travel Rolls export**
- **In automatic staff notifications, when referring to absence reasons, the terms 'legal / not legal' have been changed to 'counted / not counted'**
- **Added a new Consecutive Absences report that is filterable**
- **Added the option to overwrite absences in Bulk Absences without an absence reason**
- **Added a counter to view the number of pending Travel Change Requests**
- **Updated the Daily Travel register "Print by Roll class" to only show 1 line per student**
Located in: School Attendance | Travel | Daily Lists and Rolls | Export
- **Added the option to include student photos in printed travel rolls**

New Features

- **When reviewing Travel Change Requests, users can now expand and view the entire comment when reviewing the request**
- **The reason for requesting the Travel Change Request can now be viewed**

Attendance PxP

Improvements

- **Added the ability to configure desktop client or Google Mail for users emailing parents or students from Roll Marking**

Calendars

Issues Resolved

- **Certain events set to reoccur every year was applied as a monthly recurrence**
Yearly recurrence option has been updated to only support a start date. Recurrence has been locked to only reoccur for 2 years. A help alert message has been added to inform users on the parameter used for yearly recurrence

Core \ Authentication

Improvements

- **Portal SSO no longer requires the user to have an email set**

Core \ Data Sync

Improvements

- **Updated the Wonde data sync logic to ensure consistent teacher assignments to roll classes**
Wonde has advised Sentral on some changes made on how teachers are associated to roll classes in their dataset for schools using EMS. An update has been made on Sentral to match the changes and ensure consistency with teacher assignments to roll classes.

Issues Resolved

- **When using a student search field, there was no differentiation between current and future students**
When searching for students, any future students that start in the current year will display a 'Future' tag beside their name.

Daily Org

Improvements

- When covering classes, users have a new option called 'No Cover Required'

Dashboard

Improvements

- Under 'My Notices', a new feature has been added for notices to be 'Mark All as Read' or to 'Delete All'

Issues Resolved

- Activities shown in the My Events widget failed to display in chronological order
- Instead of displaying the proper count of unread notices, the counter widget displayed 'NaN'
- The staff Clock In / Clock Out button reflected an incorrect state when navigating away from the Sentral Dashboard and to a different module

Enrolments

Improvements

- It's now possible to also delete contacts when reviewing the contact search results via Advanced Search
- When deleting a contact, the warning message has been updated to provide more clarity on the consequences of performing this action
- Updated warning alert text for students which have enrolments across multiple schools within an Enterprise configuration

Updated alert message will now remind users to check the student's enrolment history via the History page. The alert will also highlight data changes can affect siblings which share the same contact i.e. contact is the parent of both children

- Contacts who are also students can now be filtered out in the Student Contacts screen
- On the Associated Contacts page, when viewing a contact's 'More Details' panel, the contact's additional fields are now collapsed by default

Certain Enrolment configurations can result in a lot of additional fields for contacts. To ensure the 'More Details' panel remains easily readable and scrollable, the additional fields are collapsed by default. User can expand the fields if they wish to view or edit the information

Issues Resolved

- On the Manage Students page, if the user sorted any of the columns and then navigated to the next page of results, the sorting would automatically reset
- If any student enrolment record was created in Admissions, then it was edited and saved in the Enrolments module, the enrolment status on the record would automatically change to 'Applied'
- When searching for contacts with relationships other than 'Parent', such as step-parents, relatives or grandparents, they were not displayed in the search results
- Searching for certain staff members results in an error if the staff-school record was no longer active
- In Enrolments, the Yes/NO toggle shows twice when adding another contact in associated household page
- On the Associated Households page, adding a new contact would incorrectly populate fields with the prior contact's dataset instead of leaving the fields blank

New Features

- Users are now able to view the Audit Log history for an Associated Contact

Located in: Enrolments | Student Overview | Associated Contacts | More Details | History

Fees and Billing

Improvements

- **Added visibility on Student Departure Dates within Student Register**
- **In Banking, there is an ability to identify transactions related to a red dot report item**
This change applies to NSW government schools only
To identify the transaction(s) related to an item in the "Bank Queries List on GL Account" report ('Red dot report'), navigate to Banking | SAP Report Analysis, enter the Reference value from the report into the Reference field on the SAP Report Analysis screen, and click the Find Transactions button. The related transaction(s) are displayed in the Related Transactions table. Click the link in the Transaction column to open the transaction details in a new browser tab.
- **In the Invoice Register, we've created the ability to change payment schedule options for parents with an existing invoice**
This change applies only to independent and ACT government schools
To change the payment schedule options available to parents for an existing invoice, school users are now able to link and unlink payment schedule templates for existing invoices. To link or unlink payment schedule templates for an existing invoice, tick the invoice in the Invoice Register and select Actions | Select Payment Schedule Templates. On the Select Payment Schedule Templates pop-up, tick or untick payment schedule templates as required then select Save to apply your changes. The specified templates will become available for parents to select when setting up a payment schedule for the invoice in the Parent Portal
- **Dynamics Integration: Improvements to support scenarios relating to the retrieval of credit note and prepayment allocations from Dynamics**
This change applies only to independent schools that integrate Fees, Billing & Payments with Microsoft Dynamics Business Central

Health

Improvements

- **A new ACL - Can Access Student Documentation has been added to provide schools control who can access the Documentation page for a student**

Issues Resolved

- **In Medication Administration, certain users were able to duplicate medication administration records by pressing the Save button multiple times in quick succession**

Interviews

Improvements

- **Added the ability for staff to set a maximum interview break time limit for teachers**
A new setting has been introduced in Sentral allowing administrators to define the maximum amount of break time teachers can allocate to themselves during interviews. While teachers can add multiple break periods, the total accumulated time cannot exceed the specified limit. The break time limit can be configured directly on the Interview Setup page
- **Permission to view and export interview notes can be adjusted for more users under a new setting called "Can Export Attendees Info"**

Issue Tracking

Issues Resolved

- **The print option for a task resulted in an error if a line break was added to the 'What is the risk?' section or the 'Who is at risk?' section**
- **When attempting to print a task report for a task with multi line data in the Task field, an error would occur**

Markbook

Improvements

- Added the ability to add multiple roll classes at once to a Markbook
- Added the ability to ignore specific grades when importing from Schoolbox and default null results to 0

Messaging

Improvements

- **When sending absence notifications, the system will now select a template that best matches the chosen absence type and notification type**
Template selection has been updated to more intelligently choose the default template when sending absence notifications. For example, if sending a Whole Day absence notification via SMS, the system will automatically select a template configured for Whole Day absences sending via SMS
- **Minor UI improvements made on the Assign Access screen**
Changes have been made on Setup Messaging | From Email | Assign Access.
The heading **Accessors** has been renamed to **Assigned Access**
The heading **Accessor Name** has been renamed to **Name**
The heading **Accessor Type** has been renamed to **Type**
Added spacing on the left hand side to prevent text from appearing directly against the border

Issues Resolved

- Data formatted with the table feature in Email templates was not displaying the correct information in received emails
- In the Address Book, the preferred name for staff was not displayed, despite the setting being configured to use and show the preferred name

People

Issues Resolved

- Marking a staff member as 'Left' in Enrolments caused the Additional Details and Employment Record sections to disappear

Portal

Improvements

- Parents can now attach proof of immunisation when submitting the Medical Amendment Form via the Parent Portal or App

Issues Resolved

- Pending future absence request response notes incorrectly displayed the response status as Cancelled in the Parent Portal

New Features

- Updated attendance in the portal to reflect the number of whole or partial absences
This change applies to NSW government schools only

Portal Console

Improvements

- Parents received a single notification for multiple class changes, instead of separate notifications for each change
- Parents received email notifications for newsfeed items incorrectly after the email notifications feature toggle was enabled

Purchase Orders

Improvements

- **Purchase Order notifications can now be configured separately to be sent when they are created and updated**
- **Users will not receive a notification message for the Purchase Orders they've created when moving them to approval**

REST API

Issues Resolved

- **In Enrolments, the priority attribute was not properly respected for the studentEnrolmentsDraft endpoint**

Resource Booking

Issues Resolved

- **In Bookings, an exception error was encountered when users attempted to edit certain recurring bookings**
- **Selecting Next term in resource booking was looking for Term 5 2025 instead of Term 1 2026**

Staff Absences

Improvements

- **In Staff Sign In, support has been added for signing in on non-school days**
Sign In for staff was previously restricted to only school days. This restriction has now been removed, allowing staff to sign in on non-school days.
An additional prompt now informs staff when they attempt to sign in on a non-school day. This relaxed restriction and prompt also applies when an admin manually enters a sign in record for a staff member via Staff Sign In Register during a non-school day

Issues Resolved

- **When attempting to update the date for a staff absence, a green alert was displayed stating the staff absence was saved successfully, but the date change was not saved**

Staff Profiles

Issues Resolved

- **An error occurred when users clicked on certain medication's View / Edit hyperlink on the student's Enrolment Summary page**
- **For Wonde, the family note flag for students was being incorrectly set to inactive by default when running the data sync**

Timetables

Improvements

- **Added the ability to update class names and create new classes when importing from SentralXIs**
- **API: Added a class type filter for student lessons**
- **Added the ability to export the current cyclical timetable in Excel format**

Wellbeing

Improvements

- **The incident summary now shows the attachment count for each incident**
- **Updated the ability to print and edit letters within Incidents**

Buttons are now clearly labelled to indicate when users have the option to create or edit letters. Users will be able to print existing letters associated with incidents without needing to edit them.

Located in: Wellbeing | Incidents | Letters.
