Release Notes – Appendix

Overview

With this release, you will see the results of some architectural changes completed by our developers. Notable changes are those listed below.

> ⓘ *Note:* What you see may vary based on the configuration within your school.

Academic Reports

Improvements

- **Updated text colouring in the Comment Wizard to improve readability**
- **Updated the font on the Print Assessment Report button, located on the Assessment screen**
- **Implemented the Strands Overview menu to allow a Progression Point Score to be manually overridden for the purposes of exporting to CASES21**
- **Added the Strands Overview menu to allow a Progression Point Score to be manually overridden for the purposes of exporting to CASES21**
- **Added an option to the Progression Point Breakdown component to hide rows with Non-Participation Results**
- **Enabled Comment Starters to be manually edited and deleted within the Comment Wizard**
- **Enabled Comments to be split over multiple pages when printing**

Issues resolved

- **If you were within a subject set up to assess students using a Progression Point scale, accessing the outcomes screen for data entry could result in a Sentral Exception**

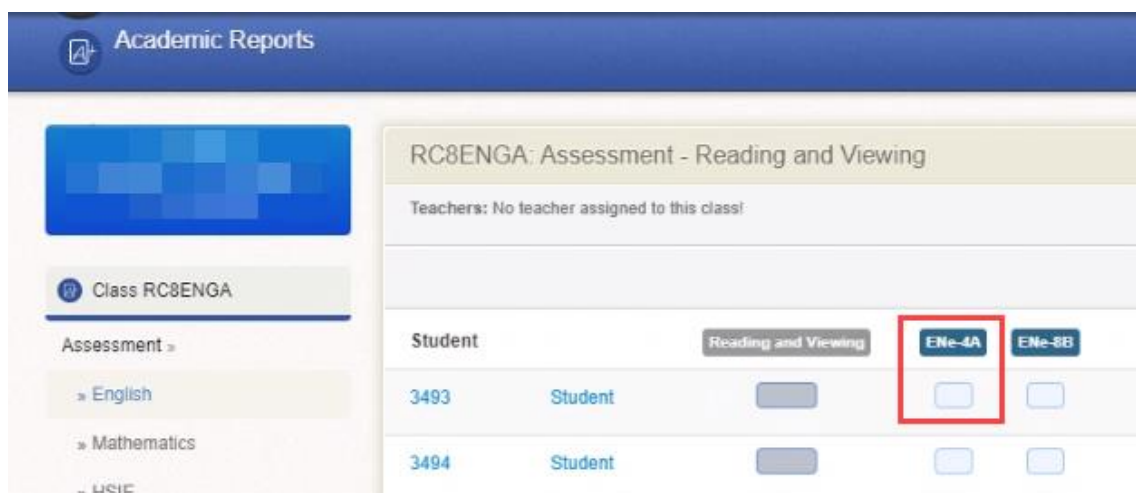

Figure 1: Example Assessment screen for a subject

- **The tooltip within the Assessment screen could incorrectly display the semester and year when a student should have achieved a Progression score according to the Assessment matrix, rather than when the student actually achieved the score.**

- **Comment formatting saved to the Comment Bank could be lost when inserting comments from the Comment Wizard**
- **Data could be lost when working in two reporting periods simultaneously**
- **Course results could incorrectly display in Primary or Interim Reports**
- **Subjects configured as Subject + Outcomes could fail to save when assigned to a Primary-style Assessment Schema**

Activities

Improvements

- **Cost Subsidy: The costs interface for an activity can now support adding subsidy costs. Any subsidy added will be shown in the cost breakdown.**

Figure 2: Cost Subsidy screen

- **Activity: A new setting has been introduced that allows the enforcement of points cap for categories configured in the Activities module.**

Figure 3: Setup Activities | Settings

Analysis

Improvements

- **Added the capacity to import Running Records**

Issues resolved

- **The Academic VCAA was not calculated correctly when data was imported from Academic Reports**

Attendance

Improvements

- **Updated the styling on the Term picker**
- **Added an option to Exporter to select Comments only if modified – WA schools only**
- **Added drag-and-drop functionality for uploading medical certificates**
- **Added a setting within School Attendance Setup | General Settings called 'Allow attendance administrators medical certificate privileges'. When set to 'Yes' an Add Medical Certificate button displays in the user interface**
- **Added Notification settings for Future Absences**
- **Added a Requires Action option to the Future Absences screen**
- **Added the option to send Parent Portal users Feed items related to Sickbay entries from the Register and current pages in Attendance**
- **Added a Per Student option when generating an official Record of Attendance report**
- **Added the ability to run the Attendance export by a single calendar year**
- **Added the Working with Children Check (WWCC) on Kiosk Visitor Sign-In**
- **Added the Date and Time to the Sticker layout of Incursion slips**
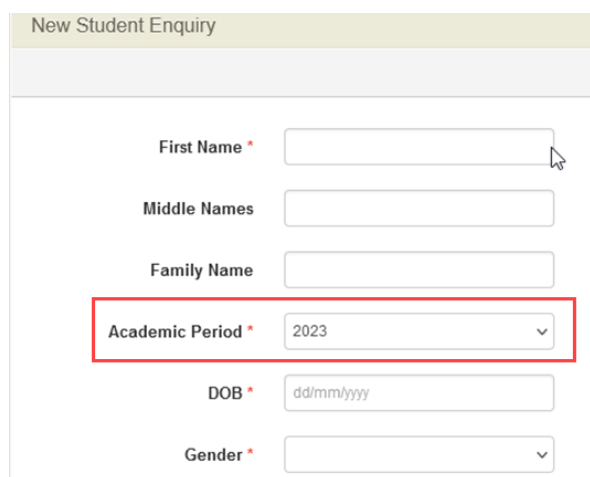

Issues resolved

- **Roll class names would not display properly in the user interface when there was an apostrophe in the name**
- **Letter template icons could be misaligned when template names were long**
- **The date picker would not appear for users to select the date range when exporting absences**
- **Flags set to Show on Roll would not appear in the Attendance module**
- **Inactive reasons were visible on the Reason Management screen**
- **Submitting a barcode roll could override existing absences**
- **Students could sign in using reasons that were locked**

Enrolments

Improvements

- **Enquiry: Added an option for schools using enquiry records to select an academic period for the potential student record**

Figure 4: New Student Enquiry | Academic Period field

House Points

Improvements

- **Added an alert to the user that at least one house is required when adding house points**
- **Removed the ability to delete the default scoring period**

Interviews

Improvement

- **An error message was added to address overlapped bookings**

Figure 5: Before and After error messages
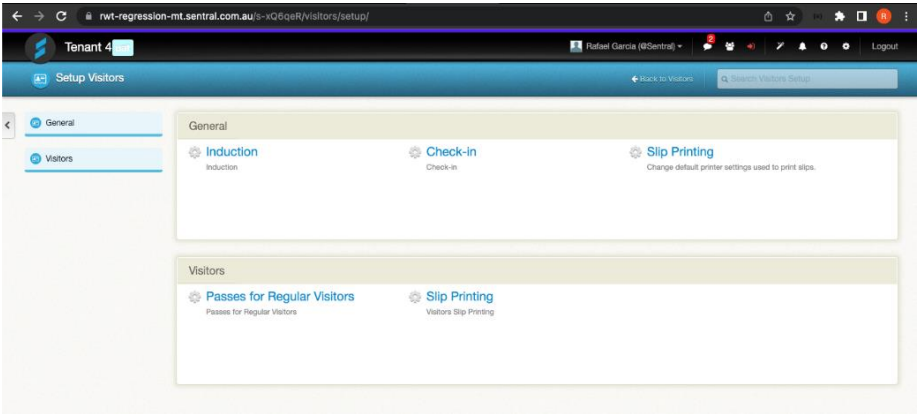

- **Visitors – Added an option for automatic check-out**

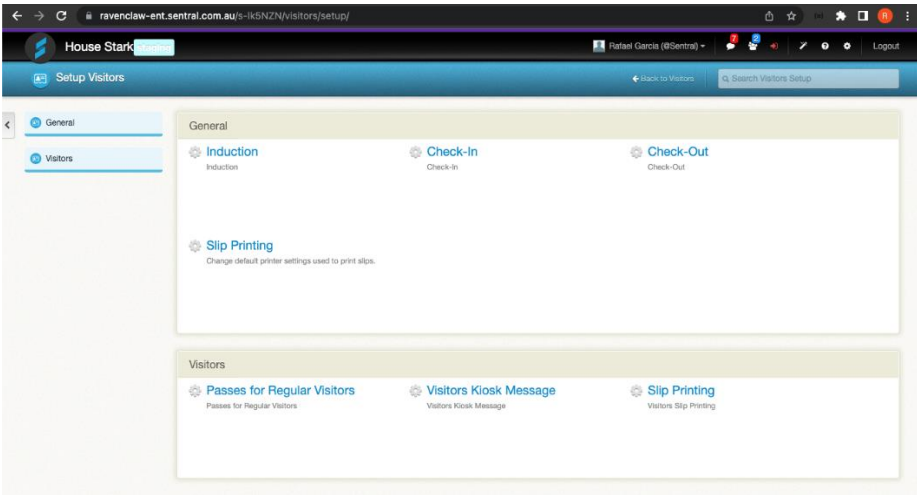

Figure 6: Before improvement

Figure 7: After improvement

**Figure 8: Options after improvement**

- **Schools could request an interview with parents even if an interview had already been requested.**
  An error message now displays indicating that an interview for the student has already been requested.

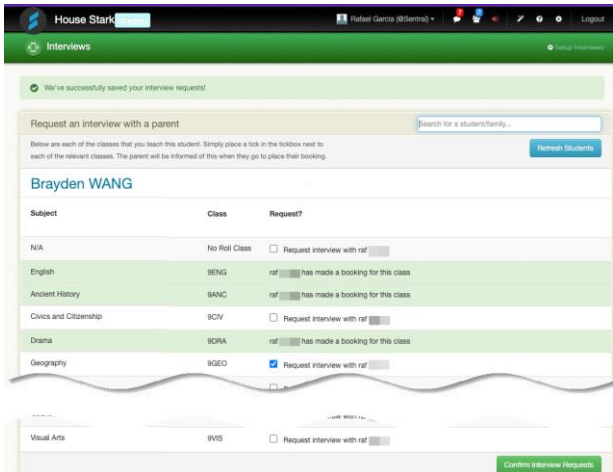

**Figure 9: Example of screen before issue resolution**

Figure 10: Error message after issue resolution

- **Visitors Check-In: WWVP status checks were not added for Tasmanian residences.**

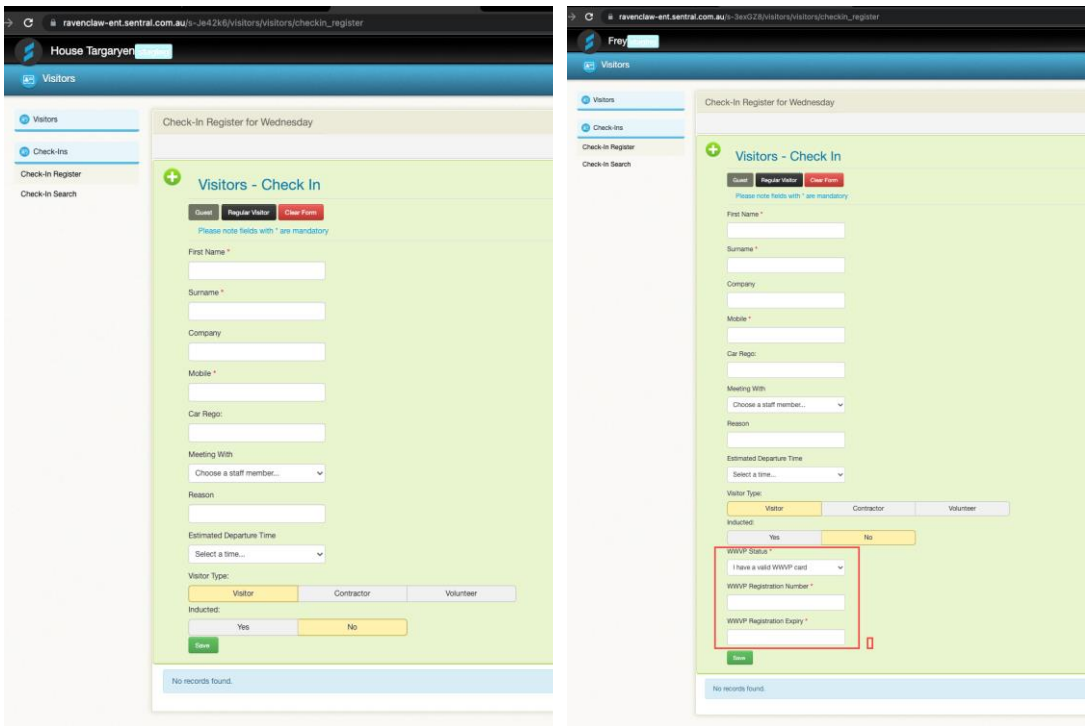

Figure 11:Screen example before issue resolution

Markbook

Improvements

- **Removed the ability to select the export option unless all required fields have been completed**
- **Enforced the requirement for the Faculty Name field to be completed when creating a new Faculty/Group**
- **Added a loading icon to indicate that a Markbook imported via a file is being processed**

Plans

Improvements

- **Added Responsible Staff and Evaluation Due Date to Plans**
- **Improved the display of Relationship Types in View and Edit plan screens**
- **Included the titles of Contact 1 and Contact 2 Relationship in Edit mode**
- **Updated the formatting to remove spaces between brackets and their contained words**
- **Updated the formatting to add spaces before the opening brackets**

Issues resolved

- **Outcomes only applicable to high school students would display for primary school IEP Plans when entering new goals**
- **Attempting to edit a Plan could result in a timeout error**

Profiles

Improvements

- **Legacy: Added settings which can control the display and usage of Profiles v1 for schools that still rely upon the older version of profiles module**

Figure 12: Profile settings

PxP

Improvements

- **Added an option to source the attendance data for the Attendance Percentages (on screen and in the report) from Attendance rather than PxP data.**
  This was introduced for schools that update records in Attendance but do not modify the original rolls in PxP.
- **Added multigrid support for PxP**
- **Added a Percentage Export for International Students**
- **Updated Timetable screen styling**

Issues resolved

- **A Reason Type flagged as Explained could still display in the rolls as Unexplained**
- **The Truancy Report would fail to filter by School House**
- **The Attendance Comparison report would generate inaccurate Attendance Details**
- **Incursions could still be created when the setting Setup > Quick Actions > Incursions was set to No**
- **Absence data could fail to appear on the Print Roll Sheet, even when selected**
- **HTML characters could appear in the Daily Roll**
- **The Copy Period form was too wide for the screen**

Resource Booking

Improvements

- **Multi Grid: Added the ability for multigrid configurations to have a Default Campus set for Resources.**

Timetables

Improvements

- **Updated styling for Student Locator**
- **Added setup screen for campuses to allow the setting of a default campus used in Resource Booking syncs**
- **Fixed Resource Booking Period import to only use the default campus.**
- **Added a warning to Resource Booking imports from Timetables that displays when no default campus is selected**
- **Replaced buttons with tabs for the Search selector**

Issues resolved

- **The Student Locator screen would not load the data for the selected student**
- **HTML characters Would Appear the Timetable header if the staff member's name included a special character**
- **Printing student timetables in bulk could result in an error**
- **The Timetable interface would display the number of teachers associated with the class instead of the teacher names**
- **Room availability would not displaying correctly if a Class Lesson was not defined via Edval**

Wellbeing

Improvements

- **Added the ability to export Student Awards from Wellbeing.**
- **Added the ability to view a list of students with Award nominations who have subsequently had Awards removed for cleanup purposes**
- **Updated the styling on the term picker**
- **Added a Nominated Contact field to the Suspension form.**
  This allows the user to select a staff member as the appropriate contact for the Suspension process, and include the staff member's name in any appropriate letters by using a merge field.
- **Disabled the Save button while an incident is being generated to prevent duplication**
- **Updated the Incident creation and edit interface to function correctly when used on a tablet**
- **Updated Email confirmation screen so that it reports when emails are not sent for Incident notifications**
- **Added the ability to filter students on an Expired level by year level**
- **Added Compass Chronicle Importer**
- **Added ability to filter Incident reports by Academic class**
- **Added clearer warnings during edits to Award nomination rules to indicate the impact of the changes on existing awards**

Issues resolved

- **The bold and italic buttons would not apply the appropriate HTML tags when editing letters**
- **N-Awards could sometimes fail to save correctly when the Resolved status was selected**
- **Notes missing a sub category could be incorrectly excluded when running a Notes report**
- **If an Incident report found no matching results, the search form could reset itself upon screen reload**
- **Incorrect letter templates could be removed when deleting letters**
- **Automatic notifications could display an incorrect tally of Associated Records**
- **The icons indicating Level movement did not point in the appropriate direction to show the student as moving up or down**

Core Platform

User interface changes

- **Header Bell icon removed**
- **Need help? button is a different colour**
- **Header > Super User > My User Profile dropdown has an extra menu item – View Recent Reports – Super users only.**
- **Impersonate as another user > Header > Magic Wand (Super User) icon has been removed. It was used to display only one menu item called Report an issue and this functionality has been removed.**
- **Header > Super User – Changes to menu options. Some removed and some added**

Figure 13: Menu options removed
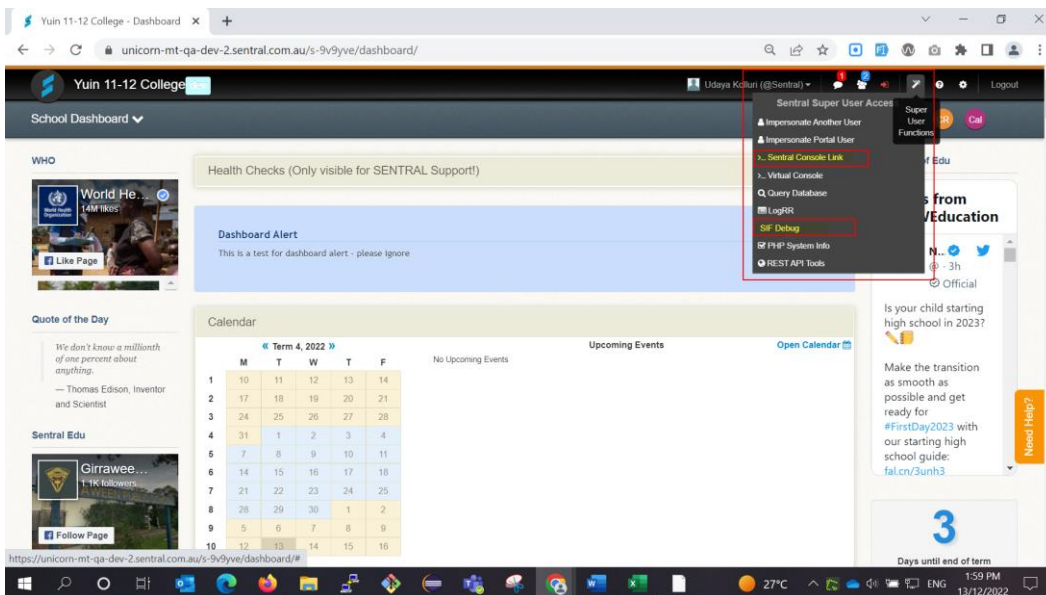

Figure 14: Menu options added

- **Removed the Add New Campus button and School Campuses menu option**
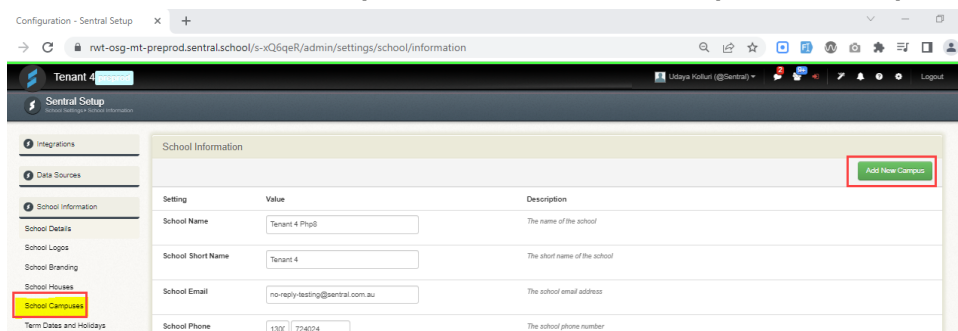

Figure 15: Menu option and button removed

- **Removed Moodle functionality**
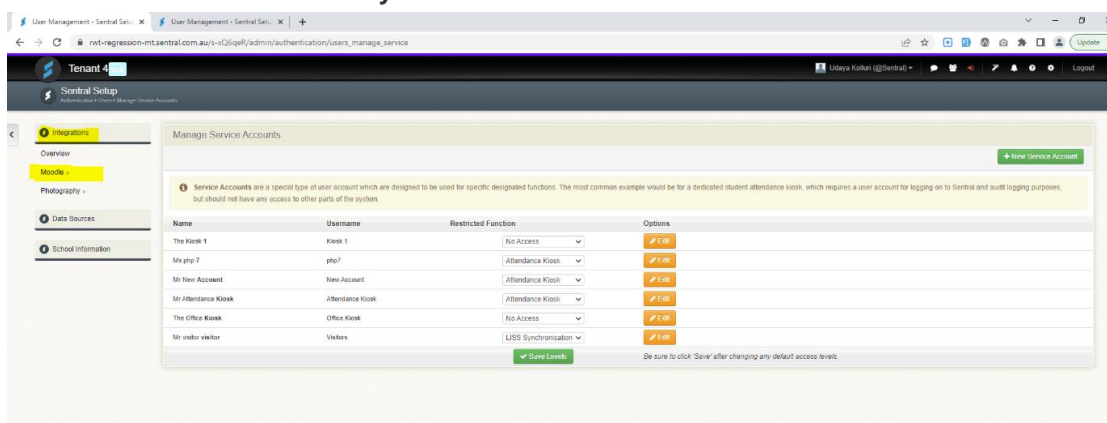

Figure 16: Menu options removed

Improvements

- **My User Profile: Added two-step authentication functionality**

Figure 17: New menu option

- **Added a Modules dropdown to the Need Help tab**

**Figure 18: New dropdown**

- **Sentral Setup > Added new menu options**

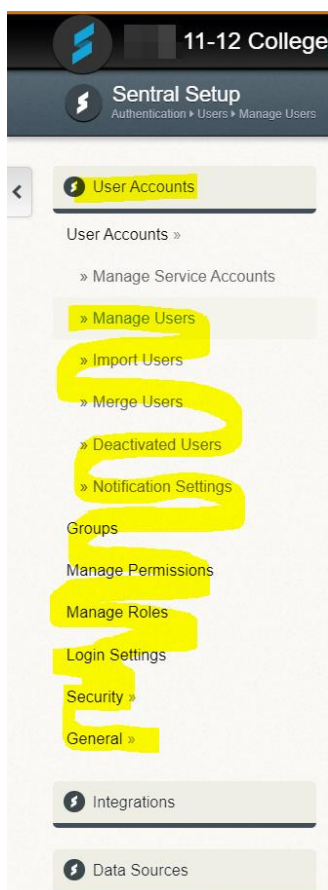

Figure 19: New menu options

Figure 20: New menu options
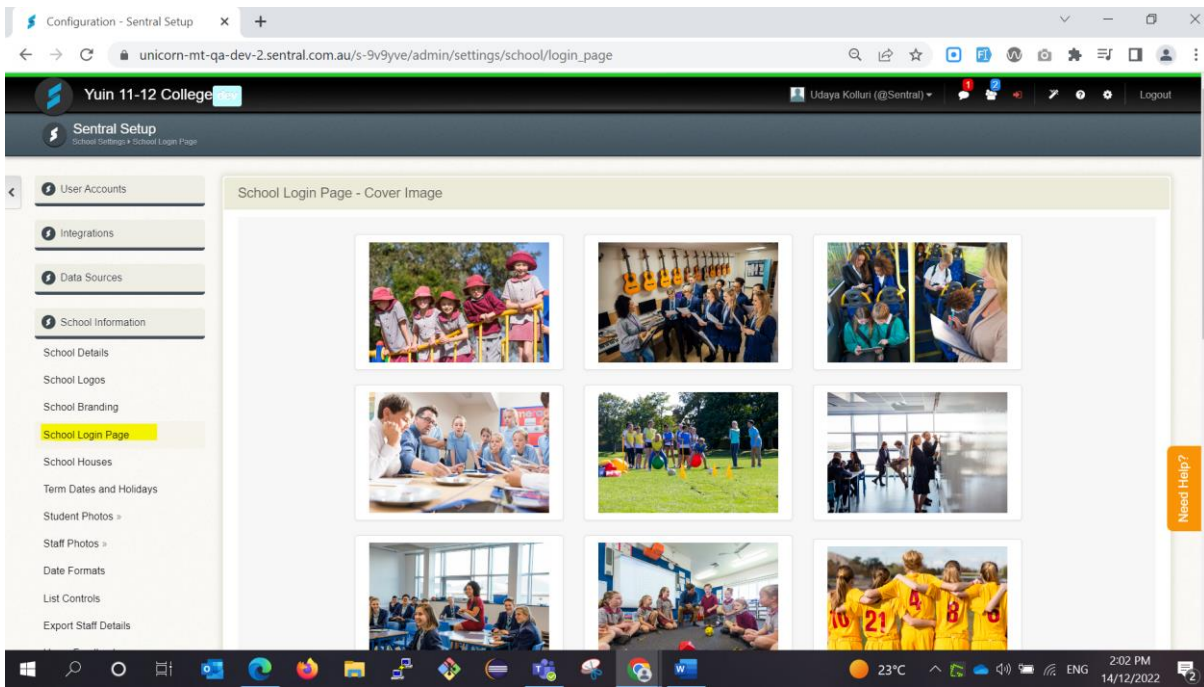

- **Added a School Login Page**

Figure 21: Menu option added

Issues resolved

- **Super User > SIF Debug – no data was displayed**
- **Delete button and select image did not work on the School Login Page**

Figure 22: School Login Page example

- **(ACT) An error would display when the Search button was selected on the Relief Staff Access Portal**
Sentral Setup > Grant Relief Staff Access menu
