

# Service Release Notes

**Version** 24.2.1-p1

**Release date** 11/4/2024

## Wellbeing

### Issues resolved

- **The total suspension days for a student were not updated correctly when an early return date was added to a suspension**
- **NSW DoE Suspensions: Notice of Potential Expulsion was not allowing a suspension extension of 15 days**

**Version** 24.2.1-p2

**Release date** 16/4/2024

## Enrolments

### Issues resolved

- **Contacts: An issue with the 'can\_self\_guardianship' feature resulted in student 'self contacts' incorrectly syncing, causing problems with student contact priority ordering**

**Version** 24.2.2

**Release date** 22/4/2024

## Core Platform

### Improvements

- **Removed the 24-hour expiry timeout from the login session cookie**  
When logging in, the session cookie was set to automatically expire in the browser 24 hours from the initial login.

## Academic Reports

### Issues resolved

- **VCAA subject link for Mathematics Version 2.0 was not visible when adding subjects to a reporting period**
- **Banner component: School logo was not showing**
- **Updated the outcomes for NSW BOS 11-12 Geography**
- **Banner Logo header style: School logo was not showing**
- **School Activity Points component: This component would cause an error when printing**
- **Achievement Tally component: When printing reports with this component, an error displayed if Subject Group was selected**

## Activities

### Issues resolved

- **Activity event repeated in the parent calendar every day even though it was set to run on specific days of a week**
- **Unpublishing an activity did not remove existing Portal permissions**
- **Activity permission slips (granted by parents) incorrectly displayed as "Unknown" in the activity permission response section**
- **Calendar was not automatically updated on archiving an activity**
- **Duplicate invoices were sometimes created for all students in a published activity when one or more students were added to (or removed from) the activity**

This issue occurred if the 'Create portal payment requests for invoices when publishing to portal?' setting was set to Yes on the Fees, Billing & Invoicing Settings screen in the Fees, Billing & Payments module

Setup Fees, Billing & Payments | Fees, Billing & Invoicing Settings

## Analysis

### Issues resolved

- **NAPLAN data was displaying as numerical bands instead of proficiency ratings**

## Calendars

### Improvements

- **Provided the ability to embed Calendar views in external websites**

## Continuum Tracker

### New features

- **Victorian schools: Updated Continuum Tracker for Mathematics 2.0**

## Core\Data Sync

### Issues resolved

- **Data Sync: The setting called 'Ignore non-residential guardian contacts' was not being respected**

This issue affected NSW DoE schools.

## Enrolments

### Issues resolved

- **Case management screen for departed students redirected to the new school instead of the departed school**

Student overview | Confidential | View Active Cases button | Case Management screen | [Student Name link] selected

## Fees and Billing

### Issues resolved

- **Sentral Pay: Selecting an Activity as the Billing Group when creating a new payment request sometimes selected students from a different activity**

If the Create New Payment Request button was clicked on the Sentral Pay | Payment Requests screen, and an activity was selected as the Billing Group, the payment requests were sometimes linked to students from a different activity.

Note: This issue only affected payment requests created via the Create New Payment Request button. Payment requests created by publishing an activity or an invoice to the parent portal were not affected.

- **Banking [NSW DoE]: End of Day Summary report sometimes included cancelled payments in calculation of amounts displayed in Till column(s)**

The issue only occurred if a payment was created in one batch and cancelled in a different batch.

This issue affected NSW DoE schools only.

## Health

### Improvements

- **The Edit button no longer displays against an audit event**

Health Setup | Medication | Medications | Audit log tab

- **Data Sync: The Anaphylaxis label was not being displayed for anaphylactic medical conditions**

An 'Anaphylaxis' label now appears when viewing the medical condition in Health and Profiles if the 'Has been Prescribed with EpiPen' option is set to Yes.

This issue affected Enrolments schools.

- **Stock Item screen: Updated the 'Reference No' field label to 'Reference/Serial No'**
- **Medical Conditions: High Risk and Anaphylaxis fields for a medical condition were editable despite the fields being disabled in instances where the medical condition data should be read only**

### Issues resolved

- **Flags: The 'No ASCIA Plan' flag was incorrectly shown for certain students when they already had a plan**

This only affected NSW DoE schools on the SAIS data service.

- **Attempting to print the Medical Emergency Report would result in a Sentral Exception error if several medical conditions existed**

- **Medical data was not displaying properly on students' medical record screens**

This resulted in extra columns and rows of white space being introduced, pushing out certain data displays such as medical conditions.

- **Selecting the Medication hyperlink on the Scheduled Medication screen resulted in a Sentral Exception error**

- **High risk and anaphylaxis conditions were able to be added directly through Sentral when this should not have been possible**

This issue affected NSW DoE schools on the SAIS data service.

- **Medical Emergency Report: Attempting to generate this report would result in an error if the Details field contained special characters**

## Interviews

### Issues resolved

- **Break times were displaying as available in the report**  
Interviews | Actions | Print all schedules with blanks
- **Interview reports did not populate with a data field to indicate if an interpreter was requested**
- **Incorrect information displayed in the Booking Overview section**

## Portal

### Issues resolved

- **Added an error message when an deactivated user attempts to log in to Parent Portal**

## Resource Booking

### Issues resolved

- **Resources: A resource that was linked to a timetabled room did not properly show the resource being held by an existing timetabled meeting**  
For schools using Edval, meetings (i.e. Staff Meetings) sync'd to Sentral Timetables did not properly display in Resource Booking where the resource set up as a room was held by the timetabled meeting.

## Student Profiles

### Issues resolved

- **Emergency contacts 1 and 2 were not showing on the Student Contact Card Printout or Admin Enquiry**

## Wellbeing

### Issues resolved

- **When exporting an Incident report, the Incident Description field was limited to 255 characters**
