

# Service Release Notes

**Version** 24.4.1  
**Release date** 1/7/2024

## Academic Reports

### Issues resolved

- In some circumstances, the status bar for course results in the Class Summary screen was remaining 'In Progress' even when all course results had been completed
- After importing comments into a comment bank, the comments were not displayed in the correct order
- Some student photos were not appearing on the printed report
- An error message would display after a custom cohort had been successfully created
- Course Results List component: This component was displaying incorrect median column values
- When generating summary reports, Attitudes to Learning were printing in alphabetical order, rather than the order designated in the Attitudes to Learning interface
- Subject component: Not all assigned subjects were able to be removed from this component
- Some inactive students were unable to be imported into a reporting period using the 'Import Inactive Students' feature
- Achievement Tally component: When using this component with several achievement scales in the reporting period, an error would occur when attempting to print
- Overall Achievement component: The component was missing headers
- The Cases21 export was missing Mathematics 2.0 domain and dimension codes, which caused the export to fail
- Report component: The Overall Grade and Effort table was not displaying header information
- Data was not aligned correctly on the My Classes summary screen
- When viewing a class and selecting the 'Overall' heading to mark the data for the whole class, an error occurred
- Progression Point Breakdown component: This component was not displaying the yellow shading for age-expected achievement for some year levels
- Achievement Tally component: After applying the St John Bosco style to this component, an error would display when attempting to edit the component.
- The outcomes for Visual Arts Life Skills for stage 5 have been updated in the NSW BOS 7-10 Life Skills repository

## Activities

### Issues resolved

- Previously published activities incorrectly appeared as not published in the portal

## Analysis

### Issues resolved

- Naplan analysis displayed band results when it should have displayed proficiency results

## Attendance

### Issues resolved

- **When adding a sick bay entry via attendance, the 'Do Not Contact' flag was not displayed for relevant contacts**
- **Inactive students were displayed when adding bulk incursions from Activities**

## Core\Data Sync

### Issues resolved

- **Enrol date in Attendance was coming from an inactive student return record**

## Health

### Issues resolved

- **Plans: The Health Care Plans and Emergency Care Plans screen was not highlighting students with allergies**

As allergies data is now part of Medical Conditions, a new Medical Severity flag has been introduced for each student health care or emergency care plan shown via Health | Care Plans | Health Care Plans or Emergency Care Plans respectively. Hovering over a flag now displays a list of medical conditions assigned against the student. This includes any allergies recorded for the student.

## Issue Tracking

### Issues resolved

- **Widget: The My Tasks widget that shows Issue Tracking tasks related to the user would break the dashboard display if the user had numerous tasks assigned to them**

## Plans

### Issues resolved

- **Formatting within Plans was displaying HTML tags when printed**
- **Disability data: The student's Disability information was not showing on their plan despite having disabilities data in Enrolments**

## Report Writer

### Issues resolved

- **Reports: Pre-set reports with filters applied did not generate any information when PDF or CSV output was selected**

## Staff Absences

### Issues resolved

- **Absences: Adding a reoccurring weekly absence would incorrectly block additional absences that fell within the reoccurrence period despite the date being available**

## Student Profiles

### Issues resolved

- **Reports: Using the Classes filter for generating the Class List report resulted an error**

## Wellbeing

### Issues resolved

- **NSW DoE: The validation checkbox for going over maximum suspension days a year was not appearing for new suspensions**
- **Manual notification to a 'Head Teacher' was sending an alert from incidents correctly but was not allowing the recipient access**
- **The link to Lifeskills Go on the Wellbeing home screen was not consistently logging the user into Lifeskills Go**
