

Service Release Notes

Version 24.7.1-p1
Release date 19/11/2024

Academic Reports

Issues resolved

- **An error occurred when printing reports that used the modern style for the Assessment overview component**

Attendance

Issues resolved

- **Explained reason was not showing when an absence was added to a student for selected days**

Version 24.7.1-p2
Release date 22/11/2024

Academic Reports

Issues resolved

- **Slow PDF generation occurred when printing an academic report with the Progression Point Breakdown component**

Version 24.7.1-p3
Release date 25/11/2024

- **Internal**

Version 24.7.1-p4
Release date 27/11/2024

Sentral Setup

Issues Resolved

- **Roll Classes: The roll class rollover wizard for NSW DoE schools created duplicate roll classes if the 'Proceed with rollover' button was clicked multiple times**

Some rollovers took additional time, which allowed users to click the 'Proceed with rollover' button multiple times. The button is now disabled and shows 'Please wait...' text when clicked for the first time in the rollover process. A spinner icon is also visible in the button to indicate that the rollover process is still ongoing.

Version 24.7.1-p5
Release date 28/11/2024

Enrolments

Issues resolved

- **User interface: Pagination in the Manage Students page was causing duplicate student records to appear on every page**

Version 24.7.2
Release date 2/12/2024

Core Platform

Issues resolved

- **When the left sidebar was hidden, the rest of the screen remained in the same position, resulting in a lot of white space**
When the left side bar in a module is collapsed, the screen now adjusts to fill in the space.

Academic Reports

Issues resolved

- **Progression Points: Overall subject mark was not displaying if using the previous reporting period (PRP) option**
- **The Student name format on the print setting was not being respected when using the format 'Firstname Surname'**
- **The 'Allow Secondary Achievement Scale' setting was not retained when rolling over a reporting period**
- **When rolling over a reporting period, if any markbook links existed on a schema assignment and the markbook sync was locked, that information was carried over to the new Reporting period**
Markbook links will now be optionally kept on rollover and locked status will be reset on rollover
- **Image component was displaying with excess white space**
An Aspect Ratio setting has been added in the image component to reduce the white space that appears when using image by merge field.
- **When adding comments to reports, the text size buttons did not resize on smaller screens, resulting in them overlapping the comment**
The layout of the comment editing screen has been improved to prevent elements overlapping.

Activities

Issues resolved

- **Activity reminder emails were sent to emergency contacts**
- **Hazard control list in the activity risk assessment form did not show full information**

Analysis

New features

- **Added the ability to import PAT Adaptive tests**

Issues resolved

- **NAPLAN Scout Importer: Importing blank spaces in the 'Score' column caused a display error when trying to view the results**
- **The Proficiency scale legend was missing from class and year summary pages for NAPLAN**
- **The 'Set as Transfer' button with the ACT NAPLAN tests in Analysis Setup was not working**
- **The QLD 2023 NAPLAN Importer was not matching students when the name format was Lastname, Firstname**
- **The dropdown in the Below NMS NAPLAN section was not showing the correct academic years**

Attendance

Issues resolved

- **Pagination on the Incursion register was preventing the ability to print all incursions**
The 'Show all' option has been added to the pagination options on the Incursion register.
- **Attendance Percentage report was displaying inconsistent data between the export and print versions**
- **After saving or editing a partial absence, the selected pagination option reverted to the default 25 students per page**
After saving or editing a partial absence, the list now reloads with the selected pagination option retained.
- **Central Setup: Students with an inactive enrolment status were made active after eduubsif migration**

Attendance PxP

Issues resolved

- **Multi period roll marking: The MP tag was not displayed on the class view**

Dashboard

Issues resolved

- **Widgets: The RSS Reader widget did not load and show any RSS feed results despite the RSS feed URL being correct**

Enrolments

Issues resolved

- **Bulk Edit CSV: Supplying start date data during the import resulted in an error.**
- **Student Enrolment: When a new student enrolment record was created, the record could be created without filling out mandatory fields, such as the student's first name**
A popup dialog now displays informing users that a mandatory field has not been filled out when they attempt to create a new student enrolment record without completing mandatory fields. The student enrolment record cannot be created until the mandatory fields have been filled out.

Fees and Billing

Improvements

- **Xero Sync: Automatic retry of failed sync actions**
Failed sync actions will be automatically retried 3 times

Issues resolved

- **Sibling Discounts: Discount was calculated incorrectly during billing runs when a household contained an additional student for whom the household contacts were not set as 'Responsible for Billing'**
- **Payments Register: Export contained some duplicated rows**
- **Invoice Register: Export contained some duplicated rows**

Plans

Issues resolved

- **Medication expiry and review dates were not displayed on the printed plan**

Central Pay

Improvements

- **Xero Sync: Efficiency improvement for syncing of Bank Transfer transactions**

Central Setup

Issues resolved

- **Staff Signatures: 'Has Signature' column displayed 'No' for staff who had uploaded signatures**

Central Setup | School Information | Staff Signatures

Timetables

Issues resolved

- **Period times were not displayed on printed timetables when using the Print Complete Timetable option**

Wellbeing

Issues resolved

- **NSW DoE: An error occurred when sending suspension data via SAIS, preventing the incident from being saved**
- **Auto resolve for awards in incidents was not working**
