

Service Release Notes

Version 25.2.1-p3
Release date 13/05/2025

Enrolments

Improvements

- **Exports: The Student Consents export has been updated to allow the choice of exporting expired consents**
Users will now be able to choose whether expired consents should be exported for the Student Consents export.

Sentral Pay

Issues Resolved

- **A single online payment was sometimes recorded twice against the related invoice/fee**
When this issue occurred, the payment was recorded twice against the invoice/fee in Sentral but the parent was only charged once.

The issue affected independent, ACT government, and NSW government schools only.

Version 25.2.2
Release date 20/05/2025

Academic Reports

Issues Resolved

- **In the Banner component, when using the Chifley College style, the Course title was not wrapping and therefore caused an overlap with text below it**

Activities

Issues Resolved

- **Disabling the activity self-registration flag inadvertently also disabled the 'Show in Portal' option, affecting the visibility of activities on the user portal**

Admin Enquiry

Issues Resolved

- **UI: The primary email was not always displayed first if a contact has multiple emails i.e. personal and primary**
Fixed a bug in the logic that didn't result in displaying the contact's email address based upon the following priority order - Primary > Personal > Work > other email types

Attendance

Issues Resolved

- **Roll class student counts were incorrect in School Attendance**

Attendance PxP

Issues Resolved

- **The priority in clash sequence was not being respected on student timetables which were displaying non-priority classes**
LISS: Added the ability to ignore the legacy logic of treating Priority 9 in clashes as no priority
- **Rolls for composite classes, when one of the classes was cancelled, were not displaying correctly**

The roll for a cancelled class that is part of a composite class will display correctly however; the roll will not be submittable. The roll for the composite class is able to be submitted via the non-cancelled class.

- **Multi-period Classes:** An error occurred when opening composite classes where one of the classes in the composite is multi period, but the other isn't

Calendars

Issues Resolved

- **Access:** An administrator configuring the access for a calendar wasn't able to set the access for multiple staff members in bulk

Fees and Billing

Improvements

- **Voiding a paid invoice with a GST rate different to the selected account's default GST rate created a credit note with the wrong GST rate.**
This issue affected independent and ACT government schools only.

Issues Resolved

- **Dynamics Sync:** Prepayment record in Sentral was not updated correctly when the corresponding payment was fully allocated to an invoice in Dynamics
This issue only affected independent schools that integrate Fees, Billing & Payments with Microsoft Dynamics Business Central.

Integrations

Issues Resolved

- **API:** Unexpected data was appearing from the comment's endpoints

Markbook

Issues Resolved

- **When exporting a markbook, marks set with 1 decimal place were displaying with 2 decimal places in the export**

Messaging

Issues Resolved

- **Notifications:** The daily warning notification sent by the system contained a broken incomplete hyperlink to the Messaging module

Plans

Issues Resolved

- Duplicate rows were appearing when printing a plan with a table type detail
- Emergency care plan details were being shared across all students when batch printing

Portal Console

Issues Resolved

- **Portal registration emails** were distributed with raw formatting tags, indicating that the content was not properly rendered

Student Profiles

Issues Resolved

- **Search:** Certain students with a two letter surname could not be searched in the top right search box

Timetables

Issues Resolved

- **Inactive staff and faculties** were displaying as options on the meeting planner

Wellbeing

Issues Resolved

- **Access controls for incident reports were not working as expected**
The access control 'Can access incident reports' has been renamed to 'Can access reports', as it controls the access to all reports, not just incident reports. A new access control called 'Can access incident reports' has been added to manage the access to incident reports
- **Levels report 'As Of' filter was showing all data to date and not correctly using the date selected**
- **The API documentation was missing information regarding Awards**
An example award has been added to the documentation for Get Student Award Link
