

Service Release Notes

Version 25.5.0-p1

Release date 20/8/2025

Analysis

Issues resolved

- **QLD Naplan 2023 Online: Importer was not recognising '&' following a change to headers in the import file**

The importer can now accept '&' as well as 'and'.

Attendance

Improvements

- **Added the ability to select a time to send out unsubmitted rolls notifications**

Attendance | Attendance Setup | Notify Users with Unsubmitted Rolls

Portal

Regression

- **Medical Conditions: Severity dropdown lists were not working**

Portal Console | Medical Amendment | Medical Condition | Severity dropdown list

Wellbeing

Improvements

- **Email History: Added some filters and sorting to help with screen navigation**

Version 25.5.0-p2

Release date 21/8/2025

Core\Data Sync

Regression

- **EDSAS: The mobile number for certain students was not importing correctly, resulting in an error when attempting to load the 'View contacts & other details' popup in the Attendance and Profiles modules**

This only affected schools where Sentral is syncing with EDSAS.

Enrolments

Issues resolved

- **Roll Classes: The Roll Class Statistics table displayed on the Enrolments home screen did not always reflect the correct staff assignment for a roll class**

Version 25.5.0-p3

Release date 25/8/2025

Attendance

Issues resolved

- **The responses section in the Notifications tab was not displaying the Absence Types dropdown list**

This affected absence explanations received via the portal.

Attendance | Notifications | Responses

Attendance PXP

Improvements

- **Notify Unsubmitted Rolls: Added an hourly setting to enable notifications to be sent hourly**

Dashboard

Issues resolved

- **Notices:** Users editing a notice were unable to save changes if the 'Reset Read Status' checkbox was ticked

Enrolments

Issues resolved

- **Fields:** The Residential Status field values which should be hidden were still displaying on the UI

Messaging

Issues resolved

- **Messages:** Users attempting to mark a message as a Response sometimes needed to click the button twice

In Messaging | Received Messages tab | Inbox, users attempting to mark a message as a Response using the Set as Response button, sometimes needed to click the button twice instead of once, in order for the message to be marked as a response.

People

Issues resolved

- **Students:** The wrong school may have been shown for students in the search results if they were active in more than one school in an Academic Period

Portal

Issues resolved

- **Reports from previous years** would appear under the year republished rather than the relevant academic period

Report Writer

Improvements

- **Enrolments:** Added a Passport category under Enrolments to allow the export of contact passport data

Passport fields are now available in Report Writer | Reports tab | Adhoc Report

Student Profiles

Issues resolved

- **NAPLAN:** The bulk NAPLAN file uploads failed intermittently on Sentral configs with multi-node system setups

Version

25.5.0-p4

Release date

26/8/2025

Attendance

Issues resolved

- **Absences:** Auto-initiated student absences could be processed multiple times resulting in certain students receiving multiple whole day absences

Report Writer

Improvements

- **Enrolments:** Abilities and Student Abilities fields are now available in Report Writer | Reports tab | Adhoc Report

Staff Absences

Issues resolved

- **Staff Sign Out:** Staff were automatically being signed out when navigating through Sentral despite not clicking the Sign Out button

An error with the staff automatic sign out time configuration in Setup Attendance | General Settings, resulted in staff being signed out of the system earlier than intended. Since the sign

out time is also generally late in the day, staff were unable to sign back in again as the system assumes the staff member has already signed out later in the day.

Version 25.5.0-p5
Release date 27/8/2025

Attendance

Improvements

- **Added the ability to use AM/PM rolls in travel**
This change provides the ability to configure travel routes for each student per day - split between morning and afternoon arrangements.
To use this feature, add an overall travel route, and then add travel routes for each day AM and PM.
To mark attendance using this feature, view daily rolls.
Attendance | Travel | Student Travel Setup
- **Added a comment field to the Student Travel Setup screen**
School Attendance | Travel | Student Travel Setup
- **Added the option to print travel rolls by roll class**
School Attendance | Travel | Daily List and Rolls | Printing and Exports

Attendance PxP

Improvements

- **Unsubmitted rolls notifications: Added an unsubmitted classes exclusion list and updated system logic so that notifications are only sent to classes with students**
Users can choose to ignore all classes that are part of the exclusion list. Classes with types other than class (e.g. Duty) and classes with 0 students will not be included in the unsubmitted rolls notifications.

Core\Data Sync

Issues resolved

- **EduhubSIF: An error would occur when running the data sync with Subject Choice data in the dataset**
Only applicable for VIC DoE schools with Subject Choice data being sync'd.

Version 25.5.0-p6
Release date 28/8/2025

Portal

Improvements

- **Added the ability to hide the 'Permission to administer over the counter medicine' option from the parent portal's Medical Information Amendment form**

Version 25.5.0-p7

Release date 2/9/2025

Attendance

Improvements

- **Travel rolls:** Added an option to sort travel rolls to be printed by either year or student
- **Travel rolls:** Added filter options to enable users to print by roll class in Excel format

Attendance PxP

Issues resolved

- **Staff Meetings** were sometimes appearing on the timetable when there were no students or linked classes associated with them

Portal

Regression

- **Timeline data** would not load for some parents attempting to view a student's timeline

Portal Console

Improvements

- Introduced additional fields for medical condition details and severity across all medical condition types available in the Parent Portal/App

Timetables

Improvements

- Added a warning message that displays if local changes are detected when users select the **Synchronise Now** button

The warning message advises that local changes made since the last sync will be lost.

Version 25.5.0-p8

Release date 4/9/2025

Dashboard

Issues resolved

- **Widgets:** The Staff Timetable, My Timetable and Unmarked Rolls widgets on the school dashboard indicated that there were no classes or unsubmitted rolls until the screen was refreshed (F5).

Health

Issues resolved

- **Sick Bay:** Users were able to create duplicate sick bay entries by repeatedly clicking the Save button when the record also had the 'Checked Out' option selected

Messaging

Improvements

- **Export:** The outbound message export file now outputs 'Duplicate' for any recipient entries that were flagged as Duplicate when the message was sent

Wellbeing

Regression

- Attempting to load a student's incident screen resulted in an error for some students due to a matching issue with retrieving the incident record

Version 25.5.1
Release date 8/9/2025

Activities

Improvements

- **Updated the validation on the Overview page to ensure that missing date fields do not cause any information already entered on the page to be removed**
Activities | Overview.

Analysis

Issues Resolved

- **NAPLAN headers placed on the bottom of proficiency graphs were being cut off**
Analysis | NAPLAN | Percentage in Proficiencies.

API

Improvements

- **Webhook Listeners: Added ability to configure individual delivery of webhook messages**
To configure individual delivery of webhook messages, navigate to Setup | Enterprise Setup | General | Webhook Listeners Settings and select "One by One" in the "Send messages by listening group or one by one" field. By default, this field is set to "By listening group".

Attendance

Improvements

- **Resized the Attachments upload box that displays on Sick Bay entry screens**
- **Travel: Added ability to send alert to student's teachers when travel change request has been approved**

Issues Resolved

- **Inactive staff members were showing on the Roll Assignments screen**
Attendance | School Attendance Setup | Roll Assignments
- **Travel: Travel Roll Export was displaying all students regardless of the settings applied under the Exception filter**

Core\Data Sync

Issues Resolved

- **Students: Future students that were imported into Sentral were incorrectly appearing as active students**

Daily Org

Issues Resolved

- **Composite classes in Attendance PxP were showing incorrectly due to incorrect linking to inactivated day period information**

Flexible Classes

Issues Resolved

- **Teachers were unable to scroll when using the Interactive Rolls in Flexible Classes**

Interviews

Issues Resolved

- **If two sessions were added on the same day, then Interview schedules were not displaying in chronological order**
- **Cancelled interviews were displaying on teachers' schedules**

Markbook

Issues Resolved

- **When multiple Markbook tags were assigned to the same category, there was no vertical row spacing**

Portal

Improvements

- **The Parent Portal / Sentral For Parents App allows family and emergency contact details to be updated. Only available to schools that use the Enrolments module**
Once the details are submitted by the family and/or emergency contact, the details can be reviewed through an approval process. After the school has given approval, the details will be automatically updated in the Enrolments module.
Portal Console | Family Amendment | Pending Amendments.
- **Added the ability for schools to send reminder emails to parents if they haven't registered their access keys**

Portal Console

Improvements

- **Introduced an option that allows schools to send email notifications to parents for any published newsfeed item**
- **The Calendar in the Parent Portal now automatically filters to display items relevant to the student's year group**
Parents will now only see the events that only apply to their child.
- **Added a new option to distribute newsfeed updates to parents and students based on student house allocation**

Sentral Setup

Issues Resolved

- **Some users were not being displayed in the Manage User Accounts page**

Timetables

Issues Resolved

- **Daily Org classes with multiple Teachers were incorrectly assigned as substitute teachers**
- **Changes to daily timetable from Edval were not syncing across to Sentral to reflect covers**

Wellbeing

Issues Resolved

- **When editing an incident for a student, Incident Details and Follow Up Actions was displaying blank information**
Wellbeing | Incidents | Edit
