

Service Release Notes

Version 26.4.1 – 29 June 2026

Modules Affected

[Academic Reports](#), [Analysis](#), [Attendance](#), [Attendance PxP](#), [Enrolments](#), [Fees and Billing](#), [Markbook](#), [Messaging](#), [Portal Console](#), [Resource Booking](#), [Rest API](#), [Wellbeing](#)

Academic Reports

[fixed] Schema templates retain custom additional grades

Custom additional grades (such as effort names and scales) now save correctly when creating schema templates and are applied when reused.

[fixed] Schema template deletion via icon

You can now delete schema templates consistently on the first attempt.

[fixed] Attitudes to Learning header only displays when data exists

You no longer see the Attitudes to Learning component header when no data is available or the schema does not include Attitudes to Learning. The header now displays only when there are marks.

[fixed] Interim schemas access and navigation consistency

You can now see the correct Interim schemas on the Getting Started page for interim reporting periods, with links directing to the appropriate Interim schema pages. Breadcrumbs and edit pages also now reference Interim schemas instead of Overall schemas.

[fixed] Attitudes to Learning graph respects teacher name configuration

You can now see teacher names in the Attitudes to Learning Graph component display according to the configured Teacher Name Source in reporting period setup instead using the name in Staff Details.

[fixed] Consistent heading alignment in achievement breakdown component

Right-hand headings are no longer forced to centre in the Achievement Breakdown component within Subject layouts. Text alignment styles are now applied consistently across Heading and Heading Corner components.

Analysis

[fixed] Week attendance graphs alignment and header

You can now see attendance graphs ('Cumulative By Week' and 'Week to Week') correctly aligned with their headers, even when data is missing across different years. Missing weeks are now handled consistently so data is not shifted or misrepresented.

Attendance

[fixed] SMS response comments include source for partial absences

You can now always see the response source (such as 'via SMS' or 'via Portal') included in the comment for partial absences in Notifications > Responses.

[fixed] Sick bay absence comments

You can now see the absence comment field appear when resolving a sick bay record that results in a student leaving school, and comments are saved correctly. Absence comments are now visible on both the absence record and the nurses visit entry.

[fixed] Incursion type filter when changing dates

The 'Incursion Type' filter now remain applied when navigating between dates using the forward and back arrows.

Attendance PxP

[fixed] Grid Rolls print outside official roll periods

You can now print Grid Rolls for selected classes even when the chosen period is not an official roll period, so reports no longer fail to print during non-standard periods.

Enrolments

[improved] NCCD Flags rollover

The NCCD flag now remains on the student profile when transitioning to a new year, making it easier to identify supported students.

Fees and Billing

[improved] Settlement visibility in Payments Register (Independent and ACTEDU schools using Sentral Pay)

Registers | Payments Register

You can now view Sentral Pay status and settlement details (date and amount settled) directly in the Payments Register, so you can track payment outcomes and reconciliation more easily without navigating to another screen.

[fixed] Cash Register Management Report for new user excludes unrelated historical transactions (NSW government schools only)

Banking | Tills

You can no longer see unrelated historical transactions in the first Cash Register Management Report when a new user is added to a till, so the report reflects only the relevant activity by the current user.

Markbook

[fixed] Canvas external tasks load assessments for default course

Assessments now load automatically for the default selected course when adding a Canvas external task. This ensures you no longer need to reselect the course, so you can add tasks more quickly.

[fixed] Schoolbox rubric syncing applies grades across markbooks

Rubric grades from Schoolbox now correctly import and sync across all relevant markbooks. This ensures each markbook maintains its own columns and grade data.

Messaging

[Fixed] Duplicate SMS top-up charges on failed payment attempts

Failed SMS top-up payment attempt no longer result in a duplicate charge when a second attempt succeeds.

Portal Console

[fixed] Medical conditions display in parent portal

Parent portal | Medical information

Parents can now see and amend all recorded medical conditions in parent portal, not just one.

[fixed] Medical amendment view in parent portal

Parent portal | Medical information

You no longer encounter a 500 error when viewing medical amendments in the parent portal.

[fixed] Feed items visibility for unpublished activities

Parent Portal

Feed items sent to an Activity Cohort are now visible in the Parent Portal even if the activity has not yet been published, so you can ensure parents and users do not miss important updates shared via the newsfeed.

Resource Booking

[improved] Resource booking 'Detailed view' toggle

You can now switch between 'Compact view' and 'Detailed view' in Resource Booking, so you can quickly see all bookings without opening each time slot.

- 'Detailed view' displays individual bookings instead of booking counts
- Toggle available in 'Day view' and 'Week view'
- Your selected view is saved for future sessions

[improved] Month view option for resource booking date selector

Resource Booking Setup | Resource Booking | Settings | Calendar View

You can now configure a 'Month view' for the booking page date selector, so you can see and navigate by month instead of term when selecting resource bookings. The default setting is 'Term view'.

Rest API

[improved] Enrolments: The Student API endpoint includes all media consent values

The Student API endpoint now includes payload data for the following other media consent values:

- Permission to Publish Student Photograph to Printed Material
- Permission to Publish Student Photograph to Online Material
- Permission to Publish Student Photograph to Media

Wellbeing

[improved] More information in Incident Print Summaries

Wellbeing | Incidents | Print Summary

You can now include additional incident and correspondence information in Incident Print Summaries:

- 'Incident Creation Date & Time' in the Print Summary
- 'Incident Occurrence Date & Time'
- Optional 'Correspondence' section that can be enabled through configuration. It is disabled by default.
- When enabled, correspondence details such as contact, staff member, date/time, and communication details are included in the summary.

[improved] School and reporter details in Incident Print Summaries

Wellbeing | Incidents | Print

Incident Print Summaries now include the school name and clearly identify the reporting staff member, improving record keeping and document traceability.

[improved] Improved incident form display, print summaries, and staff autosave

Wellbeing | Incidents

Incident forms and summaries now display information consistently and retain entered data:

- Updated terminology from Teacher to Staff member in Incident Print Summaries.
- Additional staff members are now included in Incident Print Summaries.
- Autosave now correctly retains all selected staff members when leaving and returning to an incident.

[fixed] Overall student summary includes incidents with inactive types

You can now see incident counts displayed on the Overall Student Summary even when incident types are inactive. This ensures totals match the yearly breakdown.

[fixed] Letter preview shows correct mailing title merge field

The {ParentMailingTitle} merge field now populates correctly when previewing letters, including when 'print per contact' is turned off. This ensures previewed letters match the final output, so you can now spot errors before printing.

[fixed] Wellbeing Incident Register with outdated or incorrect URL parameters

You no longer encounter errors when opening the Wellbeing Incident Register with outdated or incorrect URL parameters. Instead, you are redirected to the current week view.

[new] ACT critical incident notifications (ACTEDU only)

Wellbeing Setup | Notifications | Automatic Notifications

There are new automatic notifications for ACT schools to notify Education Directorate School Operations and Principals when specific incident, emergency services, lockdown, or suspension events occur.

[new] View suspension outcomes in Student Summary (ACTEDU only)

Wellbeing | Students | Suspensions

You can now see whether a Suspension Proposal proceeded to suspension directly from the Student Summary page.

[improved] Suspension Proposal processing (ACTEDU only)

Wellbeing | Suspensions | Current Suspensions

Suspension Proposals are now only shown in Current Suspensions when they proceed to suspension. 'Notice to Suspend' is now called 'Proposal to Suspend' to better reflect the suspension process.
