

Service Release Notes

Version 26.4.2 – 13 July 2026

Modules Affected

[Academic Reports](#), [Attendance PxP](#), [Curriculum Reference](#), [Enrolments](#), [Enterprise Setup](#), [Markbook](#), [Portal](#), [Sentral Setup](#), [Wellbeing](#)

Academic Reports

[fixed] HSIE strands and outcomes import

You will no longer see duplicate strands created or outcomes split across multiple strands when importing NSW Years 7–10 History and Geography subjects into Academic Reports. This ensures strands and outcomes are grouped correctly.

[fixed] Progression Point Breakdown - EAL component preview and print error (VIC schools only)

You will no longer encounter errors when previewing or printing the Progression Point Breakdown - EAL component.

[fixed] API Updates for academic reports for inactive students

You can now add and update academic reports for inactive students.

Attendance PxP

[fixed] PxP class alert exclusions

You can now remove all classes from 'Exclude Classes From Alerts' in Class PxP setup when saving with 'Notify Users with Unsubmitted Rolls' set to 'Yes'.

Curriculum Reference

[fixed] NSW BOS 7–10 outcome codes display

You will no longer see incorrect outcome codes (for example, '.10' displayed as '.1' or '.20' as '.2') in the NSW BOS 7–10 curriculum, including Photographic and Digital Media.

[fixed] VET 11–12 Stage (S6) outcomes import for all states

You will now see VET 11–12 curriculum outcomes import correctly into Academic Reports for all states, not just NSW.

[fixed] AC 11–12 mathematics and English outcomes restored (NSW schools only)

You will now see the correct AC Years 11–12 mathematics and English outcomes available in Academic Reports, including legacy outcomes required for Year 12 and historical records.

Enrolments

[new] School and global consent types with attachments

Enrolments | Setup | Consent Types

You can now create consent types as Global or School-specific, so you can manage wording, policies, and timing for each school more easily.

- Global types are visible to all schools
- School types are only visible in that school
- Global types cannot be deleted – only disabled

You can now manage consent setup, capture, defaults, and reporting using both school and global records, so you can stay compliant while keeping your existing workflow.

[fixed] Document category changes

Setup Enrolments | Document Categories

You will no longer see errors when managing Document Categories without the Admissions module enabled.

Enterprise Setup

[fixed] Upload of the groups CSV file timeout error

You will no longer experience timeouts or 502 errors when uploading large Groups CSV files, including files with 651 or more entries.

Markbook

[fixed] Markbook left students error

You will no longer encounter errors when viewing Markbook left students caused by records without a student ID.

Portal

[improved] Consent visibility in Enrolments Portal

Enrolments | Setup | Consents and Parent Portal | Consent Type

You can now view only active and valid consents in the Portal, so parents are not shown deleted, disabled, or expired consents. This applies across all parent-facing consent views in the Portal.

Hidden from parents when a consent is:

- Deleted
- Disabled
- Expired

Sentral Setup

[fixed] Staff photo updates

Sentral Setup | School Information | Staff Photos | Browse Photos

Staff photos now update correctly for staff members with IDs that contain special characters like ':' and '?'.

Wellbeing

[improved] Incident right-hand side navigation menu

Wellbeing | Incidents

The right-hand side panel including Quick View panel has been refreshed with improved button styling, clearer selection states, and a more consistent layout.

[improved] Incident History logging

Wellbeing | Incidents

Incident History now records only actual field changes, providing a cleaner and more meaningful audit trail.

[improved] Correspondence date and time in incidents

Wellbeing | Incidents | Correspondence

Correspondence summaries now display the date and time the communication occurred, providing a more accurate record of incident-related contact.
