

Service Release Notes

Version 23.8.04-MT

Release date 28/11/2023

Academic Reports

Issues Resolved

- **Merge field modifier for title not working**
- **An error occurred when using the breadcrumb links on the class comments page**
- **An error occurred when printing summary reports**
- **The attribute checklist component was printing the header for students that had no attributes**

Activities

Improvements

- **Rolls: Updated the logic and content on the PDF print out for “Print Roll”, “Print Todays Roll” and “Print Roll” from the activity roll interface**

The **Print Todays Roll** option will now print the Official Attendance of the day and also print the activity roll data if the activity roll exists for today. Should the activity roll not exist for the day a blank column with today's date is printed.

The **Print Roll** option will print out all activity rolls created against the activity but not print the Official Attendance data.

The **Print Roll** option within a loaded-up activity roll will print out the Official Attendance data based on the activity roll date. It will also print out the loaded-up activity roll data.

For **Print Todays Roll** and **Print Roll**, an additional print option named 'Activity Rolls' has been added in the event an activity has too many activity rolls assigned and the print out cannot support that much data to be printed. In which case, the 'Activity Rolls' can be toggled off so the other information can be printed.

For all 3 print options mentioned previously where activity roll data is printed, a check will be made to see if the activity roll has been submitted. If roll submission has happened, then the activity roll data will print out. Otherwise, a blank column with a date as the column header will be printed instead.

Issues resolved

- **Roll: Certain students in the roll report didn't have all the Medical Condition details printed out**

Analysis

Issues resolved

- **Attempting to upload a PAT-R file would result in an unknown file provided error**
- **PATm importer returns unknown file provided**

Attendance

Improvements

- **Student attendance history will now display incursion records**

Issues resolved

- **Issues occurred when generating attendance data for Literatu**

Core / Reporting Services

Improvements

- Improved how the current report generation queue position and size is determined

Dashboard

Improvements

- **Quick Links:** Added a “Customise Quick Links” menu option under School Dashboard dropdown menu so users can edit the Quick Links without needing to create their own dashboard

Fees and Billing

Issues resolved

- **Print Receipts. Printing to 80mm printers was not working for some schools:** This issue affected NSW Department of Education (DoE) schools only.

Interviews

Issues resolved

- **Attempting to print all schedule interviews could result in an error in certain circumstances**

Mark Book

Improvements

- **API:** New endpoint to retrieve coreClasses linked to a mark book
`/v1/markbook/markbook/{id}/core-classes`

Core Data Sync

Issues resolved

- **Data Sync:** 3PI datalayer sync wasn't importing preferred names for certain students

Plans

Improvements

- **Added option for plan type flags to control flag application only when there's an active plan**

Portal

Issues resolved

- **Activity Permission: Permission for an activity submitted by the parent would carry across into Activities module incorrectly.**

Additional error handling has been added to ensure that permissions submitted by parent portal users is captured properly in Activities module as well as prompting parent portal users if an error with permission saving has occurred.

New feature

- **Parents can view student's existing medical record provided that the school is using Sentral Enrolment module**

Purchase Orders

Issues resolved

- **Dynamics Sync: Purchase Order line items were not synced to Dynamics if the Item Description exceeded the maximum length allowed by Dynamics (100 characters).**
Item Description in Sentral will now be limited to 100 characters. Existing line items with Item Descriptions greater than 100 characters will display an Edit button. You can click the Edit button to modify the item description.

Report Writer

Issues resolved

- **Reports: Deleted alumni records were still showing up in active Alumni Reports**

RestAPI

Issues resolved

- **RESTAPI: The permissionGiven for attendeeLink models were always returning true**

Improvements

- **RESTAPI: Exposed username as a new field for enrolment student data**
- **RESTAPI: Introduced a new endpoint to retrieve Staff Photos**
`/v1/enrolments/staff/{id}/photo`

Sentral Setup

Issues resolved

- **Service Accounts: An error occurred when resetting the password for a service account**

Student Profiles

Issues resolved

- **Show percentage attendance for the year and per term in the Attendance Overview**

Timetables

Issues resolved

- **API: Fixed a bug where non-timetabled classes like events were not returning a start and end time in the timetable lesson endpoints**

Wellbeing

Issues resolved

- **Changing the sort order on the Awards report after selecting 'Show all' would cause the pagination to revert to the first page**
