

# Service Release Notes

**Version** 24.0.10-MT

**Release date** 30/1/2024

## Core Platform

### Issues resolved

- **Links from emails or other locations outside of Sentral would not redirect to the correct screen following successful authentication**

## Portal

### Issues resolved

- **The printable version of a student's timetable could be accessed whilst class publishing was disabled if the student knew the URL**

## Staff Absences

### Issues resolved

- **An error message would display when users attempted to access the Relief Teachers register**

Staff Absences | Registers | Relief Teachers

**Version** 24.0.11-MT

**Release date** 31/1/2024

## Dashboard

### Issues resolved

- **The Static Text widget on the Dashboard was not displaying images**

## Fees and Billing

### Improvements

- **Sentral Pay: Added an option to display all of a debtor's payment requests when the Parent Portal is accessed via the link in a payment request email**

This option can be found under Setup Fees, Billing & Invoicing | Online Payments Settings | Guest Access Links Shows All Debtor's Payment Requests.

— If this option is set to Yes, all of a debtor's outstanding payment requests will be displayed in the Parent Portal when it is accessed via the link in a payment request notification email.

— If the option is set to No, only the payment request specifically mentioned in the notification email will be displayed.

This change does not apply for NSW DoE schools.

### Issues resolved

- **Credits/Credit Notes: The 'VOID Credit/Credit Note' option was not available on the Credits/Credit Notes screen in the Student Overview or Contact/Debtor Overview**

## Timetables

### Issues resolved

- **Synchronising a single-grid timetable after a multi-grid timetable would leave old day periods active**

**Version** 24.0.12-MT

**Release date** 1/2/2024

## Fees and Billing

### Issues resolved

- **Sentral Pay: Payment links in payment request notification emails did not work if they were clicked more than once**  
If an email recipient clicked on a link a second or subsequent time, the payment portal opened but no payment requests were displayed.

## Messaging API

### Issues resolved

- **Attempting to generate a Roll Class report for classes with no students would result in an error**

## Timetables

### Improvements

- **Publishing Info: Updated access to LISS debug files so users can view the most recent LISS payloads**  
When trying to troubleshoot synchronisation problems between timetable systems and Sentral, it can be helpful to see the raw data that is being sent to Sentral to understand why certain classes are showing or not showing on a timetable in order to determine if the problem is a result of a data issue in the timetable application. The most recent sync data for each data set can now be accessed by selecting the hyperlink on the synchronisation date/time for that data set. It will display the raw XML data that is sent as part of the sync process, and can be inspected to confirm inclusion/omission of information.

## Wellbeing

### Improvements

- **New letter templates that meet the requirements for the NSW DoE policy changes have been added to the Wellbeing Letter Repository**

**Version** 24.0.13-MT

**Release date** 2/2/2024

## Portal

### Issues resolved

- **Portal messages with attachments were causing performance issues**

**Version** 24.0.14-MT

**Release date** 6/2/2024

## Fees and Billing

### Improvements

- **Xero Sync: Added ability to sync a debtor's prepayments and overpayments from Xero on demand**  
To sync a debtor's prepayments and overpayments from Xero, select the 'Sync Prepayments/Overpayments from Xero' button on the Debtor Overview.  
An overnight sync will automatically retrieve prepayments and overpayments from the last 90 days for all debtors. The 'Sync Prepayments/Overpayments from Xero' button only needs to be selected if a debtor's prepayments and/or overpayments need to be retrieved without waiting for the next overnight sync, or if prepayments and/or overpayments that are older than 90 days need to be retrieved.  
This change does not apply for NSW DoE schools.

## Portal

### Issues resolved

- Documents linked to display in the Portal were affecting Portal performance

**Version** 24.0.15-MT

**Release date** 7/2/2024

## Attendance

### Issues resolved

- **School Attendance Setup: The description of the setting 'Default Student Name to Use' did not clearly define its purpose**  
The description has been updated to make it clear that the setting only affects rolls and reports.

## Core\Data Sync

### Improvements

- **Data Sync - 3PI: The sync will now skip over invalid student records in the class membership list**

## Dashboard

### Issues resolved

- **Lessons with no class associated were showing in the Unmarked Rolls PxP widget**

## Issue Tracking

### Issues resolved

- **Users were unable to see issue tracking tasks that were assigned to a group they were apart of**

## Sentral Setup

### Improvements

Check Staff Links will now resolve teacher mappings for Timetabler users

## Wellbeing

### Issues resolved

- **Letter template bold formatting was incorrectly adding a [strong][\strong] tag which did not work**

**Version** 24.0.16-MT

**Release date** 9/2/2024

## Fees and Billing

### Issues resolved

- **Guest access links were showing payment requests for invoices that had been voided**

**Version** 24.0.17-MT

**Release date** 12/2/2024

## Academic Reports

### Issues resolved

- **Reports: Assessment Overview preview was not displaying**

## Attendance

### Issues resolved

- **Comments in Print History could not be turned off**  
Student Attendance | Print History

## Attendance PxP

### Issues resolved

- **Timetables did not align when 'Show Student House on the Roll' was set to Yes**
- **Week Term Percentage Attendance Report: Student Name column header was incorrectly aligned**

## Integrations\Canvas

### Issues resolved

- **LMS integrations would fail for users with long NSW DoE GUIDs as their external ID**  
This issue occurred when the 50 character field size of the LMS integrations table was exceeded.

## Timetables

### New features

- **Added ability for multi-campus timetables to display lessons from all campuses**

### Issues resolved

- **Subject colour stripes could sometimes spill outside of the cell boundaries**

## Wellbeing

### Issues resolved

- **Category Tally report: The report was producing inaccurate results**
- **Incident report: The Roll Class list was not available for selection.**
