

Service Release Notes

Version 24.1.2-MT

Release date 27/2/2024

Academic Reports

Issues resolved

- **Print Final Report: Students were not displaying under 'By Student' and searching for a student resulted in a Sentral Exception error**

Core\Data Sync

Issues resolved

- **Data Sync: An exception error occurred for certain scenarios involving the SAIS data sync**

This issue affected NSW Department of Education (DoE) schools only.

Fees and Billing

Issues resolved

- **Adjust Fee Amount: 'Match existing payment amount' option did not consider credit allocations**

If credit had been applied to a fee, the 'Match existing payment amount' option on the Adjust Fee Amount function (Fee Register | Actions | Adjust Fee Amount) did not include the amount of applied credit when calculating the new fee amount.

For example, if a \$20 fee had a \$5 payment receipted and \$3 of credit applied, the new fee amount was calculated as \$5 when it should have been calculated as \$8.

This issue affected NSW DoE schools only.

Wellbeing

Issues resolved

- **Suspension related incidents were not being synced to NSW DoE**

This issue affected NSW DoE schools only.

Version 24.1.3-MT

Release date 27/2/2024

- **Internal**

Version 24.1.4-MT

Release date 29/2/2024

Admissions

Issues resolved

- **Letters: The images included in the admission letter templates weren't visible when viewing the sent email version**

Core\Data Sync

Issues resolved

- **Fixed inactive staff members still being visible in Messaging Address Book**

Enrolments

Issues resolved

- **Users were unable to navigate between screens after selecting the 'New look Sentral' button on the Manage Households screen**

Health

Issues resolved

- **Medication: Administering medication for past days did not always select the correct past date**

Sentral Setup

Improvements

- **User Interface (UI): Updated any 'Inactivate' button labels to display 'Deactivate' instead in the Roll Classes, Classes, and Houses management screens**
- **Roll Class: Made quick search available on the Staff dropdown list on the Roll Class screen**

Issues resolved

- **Classes: Users were unable to modify student lists for internal classes when it should have been possible to do so**

Version 24.1.5-MT

Release date 29/2/2024

- **Internal**

Version 24.1.6-MT

Release date 1/3/2024

- **Internal**

Version 24.1.7-MT

Release date 1/3/2024

Fees and Billing

Issues resolved

- **Email Notifications: Receipts for payments were emailed to parents multiple times**
This issue affected NSW DoE schools only.

Version 24.1.8-MT

Release date 4/3/2024

Core Platform

Issues resolved

- **Core: Changing the student name format would result in an error message**
Enterprise Setup | General | UI Preferences | Student name format

Asset Manager

Improvements

- **Rooms: Added NSW DoE specific room type codes to be selectable from a drop-down list for NSW DoE schools only**

Attendance

Issues resolved

- **Withdrawn students were showing on rolls due to an incorrect exit date**
This issue affected NSW DoE schools on 3PI.

Core\Data Sync

Improvements

- **Add Staff/Update Staff screens: Renamed 'Mobile Number' field to 'Phone Number' and added a 'Phone Number Type' field**

Enrolments

Issues resolved

- **Student Details: An incorrect Enrolment summary screen would display against a student when the Enrolments module was not in use**

Health

Issues resolved

- **Medications: Inbuilt medications were not showing on students' summary screens in certain circumstances**
Health Setup | Medications | View [inbuilt medication] | Add or Discard assignment of an inbuilt medication
- **Medical Conditions: Medical conditions were not displaying within Care Plans**
- **Medical Conditions: Data sync for NSW DoE imported historical medical conditions for students when they should not have been imported**
- **Medication Administration: The weekend administration setting in Health, with Yes and No options, was misaligned.**
Health Setup | Medication Administration | Medication Administration

Plans

Issues resolved

- **Medical Conditions were not displaying in Emergency Care Plans and Health Care Plans**

Sentral Setup

Improvements

- **Staff: Removed the ability for NSW DoE schools that have not selected Sentral as the master source of data to edit Staff information**

Version 24.1.9-MT

Release date 5/3/2024

Activities

Issues resolved

- **Medical: The Medical Information printout from an activity did not always print the medical conditions for a student**

Attendance

Issues resolved

- **Interactive rolls were creating double entries in Attendance**

Core\Data Sync

Issues resolved

- **Core: Future roll classes were displayed as inactive in SAIS**
- **Contact priority was not being respected for mobile numbers of the same type, resulting in incorrect contact numbers being displayed for student contacts**

Fees and Billing

Issues resolved

- **Cancel Payment: 'Dishonour' could be selected as the Cancel Reason for all payments methods**
'Dishonour' can now only be selected as the Cancel Reason if the payment method of the cancelled payment is Cheque.
This issue affected NSW DoE schools only.

- **SAP Sync: Payments were not synced to SAP after a Fee Mapping sync issue was corrected**

If a Fee Mapping failed to sync to SAP, then the Fee Mapping was updated to address the sync issue. However, payments associated with the Fee Mapping were not automatically synced to SAP following the successful syncing of the updated Fee Mapping.

This issue affected NSW DoE schools only.

Health

Issues resolved

- **Reports: The Medical Emergency report and ambulance report failed to print the full medical conditions data set for certain students**

Issue Tracking

Issues resolved

- **Staff were able to view and raise issues, even though issue tracking permissions were set to 'None'**
- **Categories that contained a dash, slash or dot could not be opened**

Messaging API

Issues resolved

- **Admin Enquiry: Students were displaying multiple times on the Advanced Student Information Report**

Sentral Setup

Improvements

- **Staff screen UI: Added an information box to the Staff screen advising that staff changes take a few minutes to populate across department systems following a sync**

The information box contains the following message:

'Please be aware that staff data changes sync'd from Sentral to DoE will take up to 5 minutes to populate across different DoE systems. Please do not run an immediate data sync after making staff changes as your staff data may not be accurate until the data population has occurred on DoE's end.'

This change affects NSW DoE schools that have Sentral as the master source of data.

Issues resolved

- **Staff that were set as Inactive were visible in the Staff dropdown list in the Roll Classes and Classes screens**

Wellbeing

Issues resolved

- **Suspensions (non NSW DoE schools) experienced the following suspension-related issues:**
 - Resolved suspensions were not able to be removed.
 - Suspension categories were not able to be used when no suspension types were linked.
 - Suspension categories that had been manually added were not able to be deleted, hidden or edited.

Version 24.1.10-MT

Release date 6/3/2024

Core\Data Sync

Issues resolved

- **Contacts: Mobile numbers did not appear for certain student contacts where the contact had a single mobile number but was set with the preference of 2**

Health

Improvements

- **Medications: Added a 'Puffs Remaining' column on the inbuilt Asthma Inhaler stock summary page**
The new column will show the number of remaining uses for each asthma inhaler stock item.
- **Medical Conditions: Updated the import logic for NSW DoE schools on 3PI to ensure all medical conditions will display across Sentral for students**
- **Medications: Removed the ability for EpiPens and Asthma Inhalers to be scheduled**
EpiPens and Asthma Inhalers are used adhoc during required situations and thus shouldn't be eligible for scheduling.
- **Medical Conditions: Removed the ability for schools using Enrolments to add medical conditions against students in Health module**
Schools using Enrolments should enter their medical conditions for students in Enrolments. The medical conditions data will still be sync'd from Enrolments into Health. The sync'd medical conditions in Health can only be edited to link to a medication created within Health module.

Integrations

New features

- **Self-service provisioning of School Bytes to Sentral Calendar sync**
School Bytes have updated their calendar integration to use the Sentral API. To enable this, a new Calendar Sync section has been added to the School Bytes integration tile to provision the authorisation credentials. Follow the instructions to generate a new authentication token, then complete the School Bytes form at <https://forms.gle/7UnjBKhoHbocpidcA> to activate the integration.

Version 24.1.11-MT
Release date 7/3/2024

Attendance

Issues resolved

- **The biometrics scan was not syncing data to Attendance**

House Points

Improvements

- **Added a warning when house points have been assigned to inactive houses and added an interface to move the points to active houses.**

Portal

Issues resolved

- **Street number was not visible when trying to submit an address change**

Version 24.1.12-MT
Release date 11/3/2024

Academic Reports

Issues resolved

- **Setup: Some subjects were not able to be imported from the curriculum repository**
- **Reports: Interim report periods were not able to be rolled over due to a schema change**
When schemas change from being 'Assessed by Subject and Outcome' to 'No Assessment', linked outcomes will now be removed.
- **An error would occur when printing reports if attributes used in a subject template had been deleted**
The deleting of attributes that are used in subject templates is now restricted.

Attendance PxP

Issues resolved

The parent email list was not generating on the Daily Roll screen
PxP | Classes | [selected class] | Email | All Parents in the Class

Enrolments

Issues resolved

- **User added contacts were displaying two icons displayed against them.**
User added contacts are now displayed with a 'User Added' label next to them rather than a gray circle.

Fees and Billing

Improvement

- **Publish Activities [NSW DoE]: Fees will be grouped according to the 'Default Invoicing Group By' setting**
This change impacts NSW DoE schools only.
When a 'Permission & Payment' or 'Payment Only' activity is published to the Parent Portal from the Activities module, the fees created will be grouped according to the 'Default Invoicing Group By' setting (Setup Finance | Fees, Billing & Invoicing Settings | Default Invoicing Group By).
If the Default Invoicing Group By setting is set to Student, a separate fee will be created for each student, even when there are multiple students in the same family.
If the Default Invoicing Group By setting is set to Contact, a single fee with a line item for each student will be created in cases where there are multiple students in the same family.
The Default Invoicing Group By setting is set to Student by default for all NSW DoE schools.

Health

Improvements

- **Stock Item: The Edit Item view for an Asthma Inhaler stock item can now support viewing multiple administration records if inhaler was administered multiple times**
Health | Setup Health | Medications | Asthma Inhaler – View Items | Edit Item
- **Medical Conditions: A download link is now available for any medical conditions sourced from Enrolments where attachments were uploaded in Enrolments**
Health | [Search student] | [Profile screen for selected student] | Medical data | Medical Conditions
This change applies to schools using the Enrolments module.

Issues resolved

- **Notifications: No message displayed to inform users when the Notification recipients section of Alert Settings screens was not completed**
The message 'No recipients have been selected' now displays.

Markbook

Issues resolved

- **In some situations, coordinators who had permission to archive faculty markbooks were unable to archive them as the 'Create Archive' button was not available**

Meetings

Issues resolved

- **Added local and external groups to meetings groups attending option**

Wellbeing

Issues resolved

- **Awards linked to quick incidents did not save when created via PxP**
- **Suspensions: The AM/PM option for a suspension start date has been restored so that half day suspensions can be recorded in Attendance**
- **The Wellbeing module was slow to load in some circumstances**
Improved the loading speed by adding counts into the cache.
- **Suspensions that passed over from one year to the next were not respecting holiday days when calculating end date**
- **Incident details were displaying html tags on the incident follow-up actions**
- **Sheet name in the Wellbeing Incidents export was incorrect**
