

Service Release Notes

Version 24.2.1
Release date 10/4/2024

Academic Reports

Improvements

- **Added the ability to select whole sections of Classes for import by clicking on 'Roll Classes' or 'Classes'**

Academic Reports | Setup | Reporting | Classes | Import

Issues resolved

- **New reporting periods created via rollover had the Effort scale displaying as a number**
- **Attendance percentage merge field was not calculating attendance correctly**
- **Reports: Interim schema generator would add comments by default**
This function now behaves correctly so that if comments are turned off in the overall schema, then faculty schemas have no comment option, and if comments are turned on in the overall schema, then faculty schemas do have a comment option.
- **NSW AC Digital Curriculum 11-12 stage 6 subjects were missing from repository and not available for reports**
- **Reports were printing without the title of the teacher displayed**

Admin Enquiry

Issues resolved

- **Reports: A blank screen displayed if there was no report data to generate**
All reports have been updated to present a message indicating that no report data can be generated.

Attendance

Issues resolved

- **Notifications regarding future absences were not received by the required recipients**

Core\Data Sync

Improvements

- **Staff: For NSW DoE schools, data sync has been updated to pull staff username via the DECId data field rather than EBSLogon data field**

For certain staff members, the staff username shown on their staff record via Sentral Setup | Administration Data | Staff will change.

Curriculum Reference

Issues resolved

- **Some of the Mathematics strand names in NSW AC Digital Curriculum K-6 were incorrect**

Fees and billing

Improvements

- **Cancel Fees [NSW DoE]: Introduced check to prevent cancellation of paid fees for non-student contacts**

This change applies to NSW DoE schools only.

Paid (or partially paid) fees linked to non-student contacts can no longer be cancelled (Fee Register | Actions | Cancel Fees).

This change has been applied because cancelling a paid (or partially paid) fee creates credits (i.e. Fees in Advance) for the payments, and there is a DoE requirement that Fees in Advance must not be created for non-student contacts.

For non-student contacts, payments should be refunded rather than the fee being cancelled.

Issues resolved

- **Standalone Invoice: Could not invoice an alumni student from a prior academic period**

This issue affected independent and ACT schools only.

To invoice an alumni student, use the Search Students field in the Selected Debtors/Students section of the Standalone Invoice screen (Invoice Creation | Standalone Invoice) to locate and select the student. This search will now identify any student with an enrolment record in the specified Academic Period, regardless of the student's enrolment status in that academic period.

- **Banking [NSW DoE]: Empty bank deposit was created if the Save button was clicked twice**

This issue affected NSW DoE schools only.

Health

Issues resolved

- **Attempting to print the Medical Emergency Report would result in an error**

Interviews

Issues resolved

- **Interview staff unavailability was not highlighted in the 'Print all schedule with blanks' report**

Plans

Improvements

- **Updated Student Plans Summary to show uncompleted plans**

Student Plans | Summary

Portal

Issues resolved

- **Blank screen was appearing after Parents added an access key and then navigated to a second screen on a mobile**

Parent Portal | My Access

Student Profiles

Issues resolved

- **Central Setup: The 'Show all student family contacts' setting was not being properly respected resulting in all contacts always been shown no matter how the setting was configured.**

Wellbeing

Issues resolved

- **Incidents: Additional dates for detention were not showing all time options**
- **In some circumstances, automatic incident notifications were not received by all recipients**
- **NSW DoE Schools were unable to create a suspension when an old suspension record had no end date, which caused an overlap error**
- **Suspension start date and early return dates were not validated as school days**
- **NSW DoE Schools: Formal cautions were not able to be extended by more than 5 days**
