

Service Release Notes

Version 24.6.1-p1
Release date 10/10/2024

Core\Data Sync

Issues resolved

- **Data Sync: Certain inactive students didn't properly reactivate upon an Enrolments data sync**

For schools using Enrolments, certain students that had departed earlier in the year and rejoined later in the year, did not reactivate properly in Sentral. This resulted in those students being 'unavailable', which affected tasks such as viewing and marking the student in rolls.

Report Writer

Issues resolved

- **Reports: Running an adhoc report with certain Disabilities field selections resulted in an error**

Version 24.6.1-p2
Release date 14/10/2024

Fees and Billing

Issues resolved

- **Invoice from Fees: Export button on Preview page did not work**

Invoice Creation | Invoice from Fees (Fee Creation | Fees from Billing Runs for NSW DoE schools)

Selecting the Export button on the 'Invoice from Fees'/'Fee from Billing Runs' preview screen returned to the first page of the wizard rather than exporting the preview details.

- **Fee + Receipt: 'Whoops' error appeared when creating a Fee + Receipt**

Fee Creation | Fee + Receipt

This issue affected NSW DoE schools only.

Version 24.6.1-p3
Release date 17/10/2024

Activities

Issues resolved

- **The Medical Information report for an activity did not print out additional medical details about students that was available if the school was using Enrolments module**

The following medical details available for Enrolments schools were missing from the report:

- Permission to Administer Over the Counter Medicine
- Miscellaneous (Date of last Tetanus injection, Medicare number)
- Doctors / Medical Practice details
- Prescribed Medications.

Fees and Billing

Issues resolved

- **Fee + Receipt: 'Whoops' error appeared when creating a Fee + Receipt if the student's name or the internal order description contained an apostrophe**

Fee Creation | Fee + Receipt

This issue affected NSW DoE schools only.

Version 24.6.2
Release date 21/10/2024

Academic Reports

Issues resolved

- **Overall Grade Table component: Division by zero error occurred when using progression ratings scale**
- **Course Result List component: Median course results were not displaying decimal places in this component**
- **Resending failed emails, which then succeeded, did not update the failed message**
- **A course results error occurred when attempting to rollover a reporting period**
Editing course results from a calculation type to non-calculation type will be prevented if those results are in use for calculations in a schema.

Attendance

New feature

- **Removed 'Response' field from the Mass Absence modal (overlay/pop-up)**

Issues resolved

- **Victorian Letter templates were not correctly printing styles**
- **When adding a bulk absence, no photo was displayed on screen after searching for a student**

Attendance PxP

Issues resolved

- **The Truancy report caused an error when using a large date range which attempted to load too much data**
The date range for the Truancy Report has been limited to two months of data at a time.
- **Timed absences were not appearing on the partial absences report unless a whole period absence was added**

Core\Data Sync

Issues resolved

- **EduhubSIF: The VIC DoE EduhubSIF importer incorrectly assigned multiple households as Household A when it should have been incrementing**

Dashboard

Issues resolved

- **Widgets: Changing the sorting criteria for the Welfare Levels widget did not change or update the order the results are displayed**

Enrolments

Issues resolved

- **Roll Classes: Deceased students that should be hidden were displayed on the Active Student List UI when editing a roll class**
- **Registers: Certain staff were shown in registers which didn't match up with their current or last known employment status**
- **Student: The enrolment state did not display correctly for certain students**
Certain students' latest enrolment records were not retrieved properly resulting in certain students showing an incorrect enrolment state (Alumni, Former Student, Contact, Current Student).

Health

Issues resolved

- **Medication: The Administer Medication screen incorrectly hid scheduled medication entries that expired 'today'**
Medication schedules configured with the expiry option of 'Continue until and including' should only be hidden after the expiry date set on the schedule.

Interviews

Issues resolved

- **Users who were not Admins could not toggle 'Use Online Sessions' on Session Dates**
Updated access to 'Use Online Session' toggle against session dates so that users with 'Can manage application settings' access can modify the toggle.
Interviews | Setup | Use Online Session

Plans

Issues resolved

- **Table details are default set to 25% column widths causing them to go off-screen and get cut off during printing**

Student Profiles

Issues resolved

- **Reports: In Profiles V2, generating the printer friendly printout for filtered results on Profiles homepage resulted in incorrect data**

Timetables

Issues resolved

- **The option to sort periods by start time was not working when multiple campuses were present in the source timetable data**
- **Classes from other campuses were showing incorrectly in multiple periods on timetables**

Wellbeing

Issues resolved

- **Non-NSW DoE schools were not able to add half day suspensions**
- **Letters were not auto-capitalising a letter after a fullstop, particularly when using a merge field**
- **Bullet points became unaligned if one of the rows went over multiple lines**
