

# Service Release Notes

**Version** 25.1.0-p1

**Release date** 11/2/2025

## Attendance

### Issues resolved

- **Attendance tallies were incorrect when viewing the daily roll**

## Attendance PxP

### Issues resolved

- **The lesson outline for particular future period classes was unable to be accessed due to a 'Class not found' error**

## Interviews

### Issues resolved

- **Schools experienced slow performance issues in the Interviews module**

## Wellbeing

### Issues resolved

- **NSW DoE schools: Incidents with a formal caution follow up action from 2024 were not able to be edited in 2025**

The DEL approval box will now display when creating/editing an incident with a formal caution follow up action outside of the current calendar year

- **Detention merge fields were not populating on letters when printing from the detention page**
- **An error occurred when printing wellbeing letters due to an issue with the incident ID**
- **The Wellbeing home screen was slow to load in some circumstances**

The speed of the home screen loading has been improved with the addition of indexes to the incidents table.

**Version** 25.1.0-p2

**Release date** 13/2/2025

## Interviews

### Issues resolved

- **Interviews module incorrectly displayed teacher unavailabilities**

## Wellbeing

### Issues resolved

- **The pinned Incident Report using tally by year was causing an error when attempting to access the Wellbeing home page**

**Version** 25.1.0-p3

**Release date** 19/3/2025

## Attendance PxP

### Issues resolved

- **The performance of the roll marking page was very slow in some circumstances**

## Enrolments

### Issues resolved

- **Households:** The household address history did not retain an address entry if the address was initially created alongside the household

**Version** 25.1.0-p4

**Release date** 19/3/2025

## Attendance PxP

### Issues resolved

- An error occurred when accessing some classes that were incorrectly marked as multi period.
- Manual student flags were not consistently displaying on rolls

## Wellbeing

### Issues resolved

- An error would occur when attempting to remove a student from a Wellbeing incident even though the student was actually removed

**Version** 25.1.1

**Release date** 19/3/2025

## Academic Reports

### Issues resolved

- The 'assisting teacher' merge fields were not populating in subjects and overall components when printing

## Activities

### Issues resolved

- A system error occurred when un-publishing old activities
- Adding a new student to a published activity created new fees/invoices for other students whose existing fees/invoices for the activity had been voided/cancelled

## Attendance

### Issues resolved

- Duplicate information boxes for Year 12 Last Attendance Day were displayed at the top of a student's attendance screen

## Attendance PxP

### Issues resolved

- The message regarding an automatic absence notification rules error was incorrectly displaying in a new screen
- An issue occurred in some circumstances where single period classes were created incorrectly as multi period classes
- An error occurred when attempting to open some classes via the timetable screen

## Core\Data Sync

### Issues resolved

- **SAIS:** An error could occur with the houses sync due to multiple of the same staff records attached to a house teaching group payload
- Faculties entered into Enrolments were not syncing to the Sentral database and could not be imported into Reports

## Dashboard

### Issues resolved

- **Broadcasts:** Certain staff broadcasts would not be visible to staff if the broadcast was edited after it was already sent and read by staff

## Enrolments

### Improvements

- **Exports:** The Address Collection export will now use the student's contact ordering priority to determine which household to export if the student is linked to multiple households where the Residential Status of the households is set to 'Shared'

### Issues resolved

- **Classes:** When adding or editing an academic class, the School Year dropdown displayed some inactive year levels

## Fees and Billing

### Issues resolved

- **Credit could not be allocated in the Parent Portal if the original payment was for a fee with no linked student**  
This issue affected NSW DoE schools only.
- **Xero Sync: Debtor names including certain special characters were synced incorrectly to Xero (e.g. 'á' was appearing in Xero as 'Ã¡')**  
This issue only affected ACT government and independent schools that integrate Fees, Billing & Payments with Xero.
- **Dynamics Sync: Debtor details were not automatically updated in Dynamics after a contact's email address or phone number changed in Enrolments**  
This issue only affected independent schools that integrate Fees, Billing & Payments with Microsoft Dynamics.
- **Enterprise Setup: 'Page not found' error appeared when the 'Sync with Tenants' button was selected on the Debtors screen in Enterprise Setup**  
Setup | Enterprise Setup | Fees, Billing & Payments | Debtors  
Note: This error did not prevent the Enterprise debtors data from being synced successfully to the tenants.

## Flexible Classes

### New features

- **Added information to show when a student has been marked as present within School Attendance and conflicts with absence recorded within Flexible Classes**

### Improvements

- **Added the Medical Flag for a Student when viewing rolls**  
The display of this flag is controlled using the setting within School Attendance Roll Display.

## Integrations

### Issues resolved

- **Firefly: Class external\_id was being used as the name in the Event csv file, which was generating an error when importing into Firefly**

## Interviews

### Issues resolved

- **Parents were unable to remove their selection for an interview they do not plan to attend**

## Markbook

### Issues resolved

- **An error occurred when attempting to copy the structure of a markbook in some situations**
- **Canvas Integration:** When creating an external task from Canvas, the Terms filter was only displaying 10 records, therefore access to assessments was limited

## Plans

### Issues resolved

- When printing in bulk, the Disabilities from the last listed plan were copied to all other plans
- A Sentral exception occurred when copying a plan type with a table in which some rows had been deleted

## Portal

### Issues resolved

- Parents were able to select the same interview time slot for multiple bookings

## Portal Console

### Issues resolved

- Staff were unable to locate the parent to send a portal message

## Purchase Orders

### Improvements

- **Audit Log:** Log displays the Amount of the purchase order at each approval stage.  
Purchase Order | Audit Log

## Student Profiles

### Issues resolved

- **Filters:** The checkbox for the Class or Roll Class filter did not display properly
- **Households:** The Household Code shown in the View Details popup didn't display properly if the household code had an apostrophe in it

## Wellbeing

### Issues resolved

- When in the Incident register, it was not possible to navigate to 2024 via the navigation arrow on the Term/Week selector
- Detention merge fields were not printing on letters when the detention was not linked to an incident
