

Service Release Notes

Version 25.2.0-p1
Release date 22/04/2025

Attendance

Issues Resolved

- **The activity roll inaccurately removed existing absences from the attendance module**

Enrolments

Issues Resolved

- **Fixed Export Student Background Data (SBD) not displaying Grade 0 and Unknown School education for Parents**

Version 25.2.0-p2
Release date 23/04/2025

Timetables

Issues Resolved

- **Publish Timetable calls were failing to complete when syncing from Timetabling Solutions**

Version 25.2.0-p3
Release date 24/04/2025

Fees and Billing

Issues Resolved

- **Dashboard: Some 'Scheduled' totals were calculated incorrectly in Cash Flow Analysis section**
This issue affected independent and ACT government schools only.

Version 25.2.1
Release date 6/5/2025

Academic Reports

Issues Resolved

- **The Year advisor section was showing all years instead of the selected years for the academic reporting period**
- **Academic reports in the parent portal were not displayed in the correct order**
- **The Email History page was generating an error if a student who had been emailed has since become a parent or carer contact of another student.**
- **Victorian Schools: There was no VCAA link available for Auslan when importing as a subject into a Reporting period**
- **Secondary scale ID did not stay linked when rolling over a reporting period.**

This caused an issue when marking overall achievement using the Subject and Outcomes type in schema as without any outcomes linked it was displaying the incorrect scale

Activities

Issues Resolved

- **The Manage Permission Responses section of an activity did not display the names of non-student attendees**
- **The URL to the Safe Trip Builder from the Activities Risk Assessment creator was incorrect**
- **Spaces were missing between the organisers name of an activity**
- **Schools experienced an issue where navigating to the Setup page from the Risk Assessment screen resulted in a 404 error**
- **Extending the activity permission due date did not reflect the updated data in the parent portal, preventing parents from making a payment**
- **When marking the activity roll and scrolling to the right of the screen, student names disappeared, making it difficult to complete the task**

A new option for adding the correct URL has since been implemented
We made the screen static to ensure that student names and attendance data remained visible while marking the roll and scrolling across the screen

Analysis

Issues Resolved

- **Analysis attendance summary was sometimes not auto syncing in deployments with multiple tenants**
- **Data columns for Mathematics R.S and Stan were blank when importing AlphaNumeric results**

Asset Manager

Improvements

- **Added the ability to import assets when the building specified in the csv file has been deleted**
Setup | Asset Manager Setup | Import

Attendance

Issues Resolved

- **Schools with Year 12 custom codes such as 'LB12' were not seeing any Year 12 students on the Year 12 Last Attendance Day page**
The search has been updated so that this page will now populate for all Year 12 students
- **Changes to the explanation status of built-in reasons were causing a mismatch between the internal absence code and the absence reason**
Restrict changing the explanation status of builtin reasons as they have special meanings to the system

Attendance PxP

Issues Resolved

- **Multi period roll marking: Selecting single period classes from the unmarked rolls widget on the dashboard would sometimes incorrectly create a second period, causing it to display as a multi-period for roll-marking**
- **Names on printed rolls were not displaying the same as the on screen roll**
- **Quick incidents were not able to be created from class rolls if the incident category had sub details**

Core\Data Sync

Issues Resolved

- **EDSAS: Residential addresses did not properly import for certain students despite the data being available in the import files**

Enrolments

Issues Resolved

- **Export: Certain data sets selected in Adhoc Exports incorrectly excluded former students from being exported**
- **Fixed Staff who have left the school still appearing in the permanent register**
- **Removed additional characters appearing in "Delete Contact" popup dialog heading**

Fees and Billing

Improvements

- **Debtors Register: Added the ability to filter by Xero Status**
To filter the Debtors Register by Xero Status, navigate to Registers | Debtors Register, tick the Xero Status filter, and select one of the options: Active, Archived and All.
This filter is only available for independent and ACT government schools that integrate Fees, Billing & Payments with Xero.

Issues Resolved

- **Invoice amount was sometimes updated incorrectly upon payment when a fixed amount discount was applied on a line item**
This issue only affected schools with Xero integration, and only occurred when certain fixed amount discounts were used, and when the "Should discount breakdown be on a separate line items in an invoice?" setting under Setup | Fees, Billing & Invoicing Settings was set to No.
- **Some inactive debtors were not automatically archived in Xero when "Automatically archive Xero contacts for inactive Sentral debtors" setting was applied**
Setup | Fees, Billing & Payments Setup | Fees, Billing & Invoicing Settings | Automatically archive Xero contacts for inactive Sentral debtors
This issue only affected independent and ACT government schools that integrate Fees, Billing & Payments with Xero.

Health

Issues Resolved

- **Medication Schedules: Certain date fields did not present a date picker to select a date when creating or editing a medication schedule**

Interviews

Issues Resolved

- **The wrong teacher's name was displayed when checking interview unavailabilities**

Markbook

Issues Resolved

- **Markbooks were incorrectly showing "No datalayer user" for staff who were correctly linked to users**

Plans

Issues Resolved

- **No Digital Curriculum Life Skills outcomes were available for goal setting in student plans**

Portal

Improvements

- **Updated matching logic for parents signing into Sentral for Parents using their ACT Digital Account**
ACT ONLY

Student Profiles

Issues Resolved

- **Students:** An error occurred when using the cross profiles functionality to switch the student's profile view to their previous school
- **Meetings:** The meeting record shown displayed some html code which shouldn't be displayed
- **Exports:** The PO box failed to display properly for certain addresses in the student contact card export
- **Photos:** Certain student and staff photos were rotated unnecessarily

Wellbeing

Issues Resolved

- The N-award letter merge table 'Previous N-Award By Subject' was not generating data from Term 4 the previous year for Year 12 students
- An error occurred when re-opening an existing incident that contained detention details
- Errors occurred when adding a note to a student via the student's note page
- Rescheduling detentions was allowing periods to be set on days the period doesn't run
- Reprinting of Wellbeing Letters was not updating variable content when the letter template had been changed
- Re-printing an award from the awards register filling in the wrong student details
- The Incident report when set to include empty results was not including empty results
- The suspension default absence comment for an incident was not displayed in School Attendance if the suspension was added via the students' Wellbeing profile or the suspension register
- Exporting an incident report did not export any data when the option for Year levels 'Only selected school year' was selected
- Users were incorrectly able to delete incidents even if they didn't have the appropriate permissions

The "Remove" option when editing an incident was still active when users did not have "Can Remove Incidents"

Wellbeing | Incident | Remove
